

## TROUBLE SPOTS

### RUST

The biggest enemy because the complex floor pressings were not designed to be restored, but most other places rot, too. Check the front wings (especially at the headlights), front inner wings around strut tops, front and rear windscreen pillars and scuttle panels, rear wings, door bottoms, heater plenum chamber, rear wheelarches, spare wheel and fuel-tank wells, full-length chassis legs, floorpans, including under the rear seat, inner, outer and ends of the sills and at the A-pillars, anti-roll bar and rear spring eye mounts

### INTERIOR

Correct trim parts for these cars can be scarce, especially for the lower models. Check all are present and correct in detail

### RUNNING GEAR

It's all simple and honest, so carry out the standard checks for the engine, clutch, gearbox, axle, suspension, steering wear and overheating. On RS 2000 models check for camshaft wear (partly visible via the oil cap) and evidence of cambelt swaps
