Essay On Method:

An Essay on Philosophical Method R. G. Collingwood, James Connelly, Giuseppina D'Oro, 2005-05-12 An Essay on Philosophical Method contains the most sustained discussion in the twentieth century of the subject matter and method of philosophy and an unparalleled explanation of why philosophy has a distinctive domain of enquiry that differs from that of the sciences of nature This new edition of the Essay focuses on Collingwood's contribution to metaphilosophy and locates his argument for the autonomy of philosophy against the twentieth century trend to naturalize its subject matter Collingwood argues that the distinctions which philosophers make for example between the concepts of duty and utility in moral philosophy or between the concepts of mind and body in the philosophy of mind are not empirical taxonomies that cut nature at the joints but semantic distinctions to which there may correspond no empirical classes This identification of philosophical distinctions with semantic distinctions provides the basis for an argument against the naturalization of the subject matter of philosophy for it entails that not all concepts are empirical concepts and not all classifications are empirical classifications Collingwood's explanation of why philosophy has a distinctive subject matter thus constitutes a clear challenge to the project of radical empiricism Book cover

The work in its present form with the exception of one or two printing emendations was printed in September 1906 and presented to the University of London as a thesis for the degree of Doctor of Science The results described in the essay were reached in the course of a study of the problems of Science teaching in schools and are believed to have very definite pedagogical applications These applications are not considered in the present volume but in view of the paucity of writings in English which treat of the pedagogy of Science upon a philosophical basis I have thought it legitimate to direct the attention of the interested reader to the places where I have discussed some of my topics from the professional point of view For the same reason I venture to refer to the chapter on Science Teaching in Professor J W Adamson's book on The Practice of Instruction About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
