Empirical Studies Of Programmers Second Workshop:

Empirical Studies of Programmers Gary M. Olson, Sylvia Sheppard, Elliot Soloway, 1987 This volume contains the papers presented at the second workshop on Empirical Studies of Programmers They represent a variety of approaches and topics covering the research in this area All the chapters present research that bears on programmers Together with the first volume edited by Elliot Soloway and Sitharama Iyengar these chapters contribute to a growing knowledge base about how programmers go about their task and how they progress from novice to expert levels *Empirical Studies of Programmers*, 1987 *Empirical Studies of the Design Process*, 1987 Advances in Computers, 1995-09-11 Praise for the Series Mandatory for academic libraries supporting computer science departments CHOICES Since its first volume in 1960 *Advances in Computers* has presented detailed coverage of innovations in computer hardware software theory design and applications It has also provided contributors with a medium in which they can explore their subjects in greater depth and breadth than journal articles usually allow As a result many articles have become standard references that continue to be of significant lasting value in this rapidly expanding field People and Computers V British Computer Society. Human Computer Interaction Specialist Group. Conference, 1989-10-27 These papers detail the theoretical basis and methodical practice of HCI the interaction of HCI with other disciplines and individual relevance This book is a comprehensive guide to the current research in HCI which will be essential reading for all researchers designers and manufacturers whose work impinges on this rapidly moving field Contributions are included from leading researchers and designers in both industry and academia Computer and Information Science 2010 Roger Lee, 2010-09-16 The 9th ACIS IEEE International Conference on Computer Science and Information Science held in Kaminoyama Japan on August 18 20 is aimed at bringing together researchers and scientists businessmen and entrepreneurs teachers and students to discuss the numerous fields of computer science and to share ideas and information in a meaningful way This publication captures 18 of the conference s most promising papers and we impatiently await the important contributions that we know these authors will bring to the field In chapter 1 Taewan Gu et al propose a method of software reliability estimation based on IEEE Std 1633 which is adaptive in the face of frequent changes to software requirements and show why the adaptive approach is necessary when software requirements are changed frequently through a case study In chapter 2 Keisuke Matsuno et al investigate the capacity of incremental learning in chaotic neural networks varying both the refractory parameter and the learning parameter with network size This approach is investigated through simulations which find that capacity can be increased in greater than direct proportion to size In chapter 3 Hongwei Zeng and Huaikou Miao extend the classical labeled transition system models to make both abstraction and compositional reasoning applicable to deadlock detection for parallel composition of components and propose a compositional abstraction refinement approach **Psychology of Programming** J.-M. Hoc, 2014-05-19 Psychology provides a backdrop for most of the study of human computer interaction In this volume the

psychological issues that pertain to programming rather than systems design are examined in four sections Theoretical and Methodological Issues Language Design and Skill Acquisition Expert Programming and the Future The book was inspired by working groups in France and the United Kingdom but also includes work by major North American figures such as Curtis and Soloway It is the first comprehensive work on this topic since the early 1980s *Cognitive Ergonomics* G.C. van der Veer, S. Bagnara, G.A.M Kempen, 1992-05-07 This collection of papers illustrates how concepts theories and techniques from experimental psychology can be applied in the domain of Human Computer Interaction HCI An experimental psychological basis for cognitive ergonomics is presented built on a foundation of theoretical and experimental research In addition various issues in cognitive ergonomics are closely examined including performance in specific interactive tasks such as computer programming and program debugging Other subject areas covered include database interrogation text editing and graphics design *Software Design - Cognitive Aspect* Françoise Detienne, 2012-12-06 Covering a variety of areas including software analysis design coding and maintenance this text details the research conducted since the 1970s in this fast developing field before going on to define a computer program from the viewpoint of computing and cognitive psychology The two essential sides of programming software production and software understanding are given detailed treatment with parallels drawn throughout between studies on processing texts written in natural language and processing computer programs Of particular interest to researchers practitioners and graduates in cognitive psychology cognitive ergonomics and computer science
