Emperor King of Sicily and Jerusalem in whose court with its remarkably cosmopolitan and highly intellectual life may be found the real beginning of the Italian Renaissance In spite of its title it is far more than a dissertation on hunting There is a lengthy introduction dealing with the anatomy of birds an intensely interesting description of avian habits and the excursions of migratory birds Indeed this ancient book has long been recognized as the first zoological treatise written in the critical spirit of modern science The sumptuous volume now in hand is however the first translation into English of the complete text originally divided into a prologue and size books Together the translators and editors have at last made available this classic work and have adorned it with notes comments bibliographies and glossary They have produced a work of great value to zoologists especially the ornithologist and also to everyone interested in the history of science and in medieval art and letters
