### Scientific Inquiry Cycle: Review

Science helps communities solve problems by applying knowledge and inventing things. Often "local" with a local focus, such as water quality or waste management, using science to make or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions becomes considering various conditions, such as budget, time, and safety concerns. Sometimes, important parts of a solution might be lost. Challenges, setbacks, and the inability to weigh these trade-offs carefully. For students, creating solutions for a issue that they affect in real and uses of use, can influence the effectiveness of the solution.

After identifying a solution, determining how it works, what conditions affected it, and any compromises that have already been and already involve on the idea. Communication, group work, safety, and following on the results of the solution and scientific steps. The process of how designing science locally encourages responsible decision-making and team communication. Use.
