Engineering Drawing And Blueprint Reading:

Engineering Drawing and Blueprint Reading Raymond Vogts, 1981 **Interpreting Engineering Drawing** Cecil Howard Jensen, 1994-01-01 *Blueprint Reading And Sketching Including Machine Drawings; Piping Systems; Electrical and Electronics Prints; Architectural and Structural Steel Drawings*, Chapter 1 BLUEPRINTS

When you have read and understood this chapter you should be able to answer the following learning objectives

Describe blueprints and how they are produced

Identify the information contained in blueprints

Explain the proper filing of blueprints

Blueprints prints are copies of mechanical or other types of technical drawings

The term blueprint reading means interpreting ideas expressed by others on drawings whether or not the drawings are actually blueprints

Drawing or sketching is the universal language used by engineers technicians and skilled craftsmen

Drawings need to convey all the necessary information to the person who will make or assemble the object in the drawing

Blueprints show the construction details of parts machines ships aircraft buildings bridges roads and so forth

BLUEPRINT PRODUCTION

Original drawings are drawn or traced directly on translucent tracing paper or cloth using black waterproof India ink a pencil or computer aided drafting CAD systems

The original drawing is a tracing or master copy

These copies are rarely if ever sent to a shop or site

Instead copies of the tracings are given to persons or offices where needed

Tracings that are properly handled and stored will last indefinitely

The term blueprint is used loosely to describe copies of original drawings or tracings

One of the first processes developed to duplicate tracings produced white lines on a blue background hence the term blueprint

Today however other methods produce prints of different colors

The colors may be brown black gray or maroon

The differences are in the types of paper and developing processes used

A patented paper identified as BW paper produces prints with black lines on a white background

The diazo or ammonia process produces prints with either black blue or maroon lines on a white background

Another type of duplicating process rarely used to reproduce working drawings is the photostatic process in which a large camera reduces or enlarges a tracing or drawing

The photostat has white lines on a dark background

Businesses use this process to incorporate reduced size drawings into reports or records

The standards and procedures prescribed for military drawings and blueprints are stated in military standards MIL STD and American National Standards Institute ANSI standards

The Department of Defense Index of Specifications and Standards lists these standards it is issued on 31 July of each year

The following list contains common MIL STD and ANSI standards listed by number and title that concern engineering drawings and blueprints
