Rendering Techniques '99 Dani Lischinski, Greg W. Larson, 2012-12-06

This book contains the proceedings of the 10th Eurographics Workshop on Rendering which took place from the 21st to the 23rd of June 1999 in Granada Spain Originally an outgrowth of the annual Eurographics meeting the workshop was organized by a dedicated group of researchers who felt there was insufficient opportunity at Eurographics and Siggraph to

exchange ideas specifically on rendering Over the past 9 years the workshop has become renowned as an international watershed for top quality work in this field attracting between 50 and 100 attendees each year to share their latest research This year we received a total of 63 submissions Each paper was carefully reviewed by two of the 25 international programme committee members as well as two external reviewers selected by the co chairs from a pool of 71 individuals The programme committee and external reviewers are listed following the contents pages In this new review process all submissions and reviews were handled electronically with the exception of videos submitted with a few of the papers This streamlined the review process considerably while reducing the costs and confusion associated with courier delivery of hundreds of papers

England and Russia Face to Face in Asia Arthur Campbell Yate, 1887 *Empire Review*, 1912 The King with Two Faces Mary E. Coleridge, 1898 *Geometry* Marcel Berger, 1987 This is the second part of the 2 volume textbook *Geometry* which provides a very readable and lively presentation of large parts of geometry in the classical sense An attractive characteristic of the book is that it appeals systematically to the reader's intuition and vision and illustrates the mathematical text with many figures For each topic the author presents a theorem that is esthetically pleasing and easily stated although the proof of the same theorem may be quite hard and concealed Many open problems and references to modern literature are given Yet another strong trait of the book is that it provides a comprehensive and unified reference source for the field of geometry in the full breadth of its subfields and ramifications
