Subcommittee on Oceans, Atmosphere, Fisheries, and Coast Guard, 2012 **Real-time Forecasting for Renewable Energy Development** United States. Congress. House. Committee

on Science and Technology (2007). Subcommittee on Energy and Environment, 2010 A significant barrier to the widespread adoption of many forms of renewable energy including wind solar and marine and hydrokinetic power is that these sources are intermittent Electric grid managers address this intermittency by adjusting the delivery of other sources of power based on expected changes in renewable power output These expected changes are called power production forecasts Such forecasts must take into account changing weather conditions in conjunction with the land s topography near a renewable energy device along with the device s expected technical performance Several recent reports have determined that improving the accuracy and frequency of these forecasts can have a major impact on the economic viability of renewable energy resources This hearing provides testimony on the roles that various Federal agencies as well as the private sector play in providing forecasting data and services relevant to expanding the availability of reliable renewable power and the extent to which these efforts are coordinated The hearing will also explore any research development demonstration and monitoring needs that are not currently being adequately addressed P 3 4 *Open Space* Mariel Borowitz, 2024-02-06 An examination of environmental satellite data sharing policies offering a model of data sharing policy development case and practical recommendations for increasing global data sharing Key to understanding and addressing climate change is continuous and precise monitoring of environmental conditions Satellites play an important role in collecting climate data offering comprehensive global coverage that can t be matched by in situ observation And yet as Mariel Borowitz shows in this book much satellite data is not freely available but restricted this remains true despite the data sharing advocacy of international organizations and a global open data movement Borowitz examines policies governing the sharing of environmental satellite data offering a model of data sharing policy development and applying it in case studies from the United States Europe and Japan countries responsible for nearly half of the unclassified government Earth observation satellites Borowitz develops a model that centers on the government agency as the primary actor while taking into account the roles of such outside actors as other government officials and non governmental actors as well as the economic security and normative attributes of the data itself The case studies include the U S National Aeronautics and Space Administration NASA and the U S National Oceanographic and Atmospheric Association NOAA and the United States Geological Survey USGS the European Space Agency ESA and the European Organization for the Exploitation of Meteorological Satellites EUMETSAT and the Japanese Aerospace Exploration Agency JAXA and the Japanese Meteorological Agency JMA Finally she considers the policy implications of her findings for the future and provides recommendations on how to increase global sharing of satellite data *National Oceanic and Atmospheric Administration Organic Acts* United States. Mission Mystique Charles T. Goodsell, 2011 In an era filled with mistrust for big government and big business Charles Goodsell goes against this grain to draw attention to public agencies admired for what they do and how well they do it In his

groundbreaking new book Goodsell places renewed focus on organizational mission and its potential to be a strong energizing force in government one that animates a workforce internally and attracts admiration and talent externally He offers a normative template for the mystique that underlies this phenomenon and highlights in six rich case studies a driving sense of purpose a cultural and motivational richness and a capacity for tolerating dissent while still innovating and learning Analyzing what works best and what doesn't Goodsell provides a metric through which agency mystique can be evaluated and modeled Goodsell's fresh take on public agencies not only defines good public administration in terms of ethical conduct constitutional accountability and performance effectiveness but argues that the field must add the crucial standard of institutional vitality
