[Gender and the Life Course](#) Alice S. Rossi, 1985-01-01 *Gender and the Life Course* is an interdisciplinary collection of essays on the lives of women and men as they are affected by history culture demography economic and political stratification and the biopsychological processes that attend maturation and aging The book covers three major topics Part I which examines gender and the life course in broad historical perspective includes a summary of recent work in biological ecology and primatology and an analysis of the persistence of cultural and gender differences in role organization in societies undergoing the transition from agrarianism to industrialism Other essays trace the changes in sources of household income of industrial workers over the life span and review temporal and gender differences in life span transitions Part II examines gender differentiation in a variety of contexts psychological psychobiological and sociological Alice Rossi's ASA Presidential Address reviews recent work on fathering and mothering and argues that sociological explanations of such gender differences need supplementation by concepts from evolutionary theory and the neurosciences

Three essays deal with gender and economy one shows how gender stratification took hold in the early stages of industrialization in France another demonstrates the persistence of gender stratification in modern economies the third focuses on ideology in relation to gender and political power Part III examines various aspects of the aged in contemporary society including an argument for an interpretive social science that uses diverse methods to improve our ability to describe and interpret many facets of the lives of elderly men and women a review of the methodology used to study changes in the aged population over time and an overview of existing data sets that permit further cohort and longitudinal analyses of the aged The final essays review social policies as they affect the elderly with particular attention to the fact that most very old people are women and the impact of the greatly expanded life course for family and kin relations Gender and the Life Course is a state of the art assessment of the best work currently being done on gender and age a s maturational factors and is essential reading for anyone interested in adult development and gender roles

Gender Inequality in the Life Course

Hannah Brückner, 2004 How do women fare in a society that is characterized by a set of institutions that promote income stability over the life course and thereby maintain and even amplify status difference Using recently issued public files of social security records with longitudinal earnings data of well over half a million persons this book describes gender inequality in earnings and labor market participation in contemporary Germany between 1975 and 1995 Because of the advanced industrial base of Germany its relevance to other nations at the high end of production and consumer indices becomes apparent Br ckner s work is a unique combination of empirical and theoretical work She takes seriously the effect of marriage status on labor supply and wages married men work more and earn more while married women work less and earn less But to this rather conventional measure she introduces a second important consideration the life course multiple social contexts that help explain the unfolding of social action and economic status In this way the family becomes a critical factor in explaining such crucial sources of inequality as tax laws property transference and transfer payments and how these are regulated by the welfare state The results from a life course analysis are contrasted with cross sectional trends and a traditional lifecycle model to show that much depends in part on the data and methods used to explore it The work closes with a solid social scientific analysis of systems choices the private market in contrast to the social democratic welfare state solution While recognizing that the latter is a direct effort at resolving the gender gap in wages and welfare Professor Br ckner also appreciates that there are high costs to the overall economy not the least being a taxation that erodes the earning power of families and individuals as a whole and hence is less of a solution than the spreading of the problem

Age, Gender and Sexuality through the Life Course Susan Pickard, 2018-04-19 Age Gender and Sexuality through the Life Course argues that the gendered structure of temporality defined in the dual sense of everyday time as well as age and stage of life is a key factor underpinning the stalling of the gender revolution Taking as its central focus the idealised young woman who serves as the mascot of contemporary success this book demonstrates how the celebration of the Girl is i representative of

social mobility educational and professional achievement ii possesses diligence docility and emotional intelligence and iii displays a reassuring sexuality and youthfulness but is constructed from the outset to have a fleetingly short life span Pickard undertakes a theoretical and empirical exploration of the contemporary female experience of education work motherhood sexuality the challenge of having it all Furthermore through additional analysis of the transitional reproductive regime from youth into mid life and beyond this insightful monograph aims to demonstrate how age and time set very clear limits to what is possible and desirable for the female self yet how the latter factors also if used reflexively can provide the key means of resisting and challenging patriarchy This book is aimed at a broad interdisciplinary audience located in gender studies age studies culture studies sociology and psychology accessible for advanced undergraduates and beyond

Gender and Health Carolyn F. Sargent, Caroline Brettell, 1996 Gender and Health An International Perspective responds to a growing interest in the relationship between gender health care organization and health policy In examining this relationship Sargent and Brettell demonstrate how biology medicine health and ethical dilemmas are informed by culture and shaped by social political and

economic forces *Genders in the Life Course* Antonella Pinnelli, Filomena Racioppi, Rosella Rettaroli, 2007-09-06 Although both demography and gender relations have been the focus of research for quite some time the intersection of gender studies and demographic analysis is a more recent phenomenon Fortunately gender aspects of demography and demographic aspects of gender are two lines of research that have received increased attention in recent years there is a growing group of researchers active in this area and consequently a growing body of publications of different kinds Despite this books treating the topic of gender and demography in a more comprehensive fashion are rare In fact I can think of few examples since the publication of two edited volumes in the first half of the 1990s namely *Women's position and demographic change and Gender and family change in industrialized countries* both resulting from the activities of the International Union for the Scientific Study of Population The editors of the current volume are therefore to be congratulated for taking the initiative to produce a much needed volume on gender and demography in developed countries with a focus on Europe The book covers a lot of ground from the age at first intercourse over union formation and union dissolution to excess male mortality and report important findings of empirical research mostly based on comparative data from a number of European countries The source of these comparative data is in most cases the Family and Fertility Surveys (FFS) carried out in the 1990s *Gender and Career in Japan* Atsuko Suzuki, 2007 Gender has long been a major determinant of individuals work career and life trajectory in Japanese society The complexity of this social phenomenon has inspired the five contributors to this volume edited by Atsuko Suzuki to probe the nature and ramifications of changing gender norms in Japan from a multidisciplinary perspective incorporating sociology social psychology and economics *Women and Gender* Janice D. Yoder, 1999 Well grounded in research this accessible book presents psychology as it has been transformed and is being transformed by women It discusses the changes that a feminist vision of psychology has made in everything from the methods used to the topics studied With its solid grounding in contemporary feminist scholarship this book focuses on important issues such as violence against women health psychology work family balance development across the life course and sexist discrimination Written to be reader friendly the book weaves a cohesive story that delivers its main points in a clear and straightforward manner And rather than separating women's experiences by stereotyped subgroups this book integrates the diversity of women's experiences to present as inclusive a picture as possible of women and women's lives An essential reference on feminist influence in psychology for every professional in psychology and sociology **Handbook of Aging and the Social Sciences** Robert H. Binstock, Linda K. George, 1990 SEX DIFFERENCES IN DEPRESSION IN A LIFECOURSE PERSPECTIVE: THE ROLE OF PAID WORK, HOUSEWORK, FAMILY STRUCTURE AND UNION CHARACTERISTICS. PAMELA SMITH WEBSTER, 1991 We assess several theoretical explanations for the sex difference in depression in light of these data Concerns about selection and suggestions for future research are also discussed **Beyond Gender Differences** Laurie Russell Hatch, 2018-12-20 The central aim of this book is to challenge to questions like Which gender

cope better when a spouse dies and Are women or men more independent on others as they grow older Putting gender in a lifespan context Hatch Sociology U of Kentucky atypically accents the gains as well as losses of aging and sex differences in adaptation overall to the death of a spouse and to retirement A number of controversies surrounding gender and aging are addressed Connecting Gender and Ageing Sara Arber, Jay Ginn, 1995 Contributors use a feminist perspective to explore the impact of ageing on gender roles in the workplace and in retirement in marital and other relationships in community support networks and in older women's own perceptions A range of research approaches are used including qualitative studies giving a voice to older women A concluding chapter draws out the implications of the book
