General Systems Volume 14:

Neutrosophic Sets and Systems, vol. 14/2016 Florentin Smarandache ,Mumtaz Ali , Neutrosophic Sets and Systems has been created for publications on advanced studies in neutrosophy neutrosophic set neutrosophic logic neutrosophic probability neutrosophic statistics that started in 1995 and their applications in any field such as the neutrosophic structures developed in algebra geometry topology etc Summary Technical Report of NDRC, Master Subject Index United States. Office of Scientific Research and Development. National Defense Research Committee,1946 **The Theory of Info-Dynamics: Rational Foundations of Information-Knowledge Dynamics** Kofi K. Dompere,2017-12-06 This book focuses on the development of a theory of info dynamics to support the theory of info statics in the general theory of information It establishes the rational foundations of information dynamics and how these foundations relate to the general socio natural dynamics from the primary to the derived categories in the universal existence and from the potential to the actual in the ontological space It also shows how these foundations relate to the general socio natural dynamics from the potential to the possible to give rise to the possibility space with possibilistic thinking from the possible to the probable to give rise to possibility space with probabilistic thinking and from the probable to the actual to give rise to the space of knowledge with paradigms of thought in the epistemological space The theory is developed to explain the general dynamics through various transformations in quality quantity space in relation to the nature of information flows at each variety transformation The theory explains the past present future connectivity of the evolving information structure in a manner that illuminates the transformation problem and its solution in the never ending information production within matter energy space under socio natural technologies to connect the theory of info statics which in turn presents explanations to the transformation problem and its solution The theoretical framework is developed with analytical tools based on the principle of opposites systems of actual potential polarities negative positive dualities under different time structures with the use of category theory fuzzy paradigm of thought and game theory in the fuzzy stochastic cost benefit space The rational foundations are enhanced with categorial analytics The value of the theory of info dynamics is demonstrated in the explanatory and prescriptive structures of the transformations of varieties and categorial varieties at each point of time and over time from parent offspring sequences It constitutes a general explanation of dynamics of information knowledge production through info processes and info processors induced by a socio natural infinite set of technologies in the construction destruction space *A New Single-Valued Neutrosophic Rough Sets and Related Topology* Qiu Jin, Kai Hu ,Chunxin Bo, Lingqiang Li, Fuzzy rough sets are closely related to fuzzy topologies Neutrosophic rough sets and neutrosophic topologies are extensions of fuzzy rough sets and fuzzy topologies respectively In this paper a new type of neutrosophic rough sets is presented and the basic properties and the relationships to neutrosophic topology are discussed *Technology and Safety of Marine Systems* J. Wang,2003-07-22 Traditionally society has regulated hazardous industries by detailed

references to engineering codes standards and hardware requirements These days a risk based approach is adopted Risk analysis involves identifying hazards categorizing the risks and providing the necessary decision support to determine the necessary arrangements and measures to reach a safe yet economical operating level When adopting such an approach the abundance of techniques available to express risk levels can often prove confusing and inadequate This highly practical guide to safety and risk analysis in Marine Systems not only adds to the current techniques available but more importantly identifies instances where traditional techniques fall short Uncertainties that manifest within risk analysis are highlighted and alternative solutions presented In addition to risk analysis techniques this book addresses influencing elements including reliability Maintenance Decision making and Human error The highly practical approach of this title ensures it is accessible to the widest possible audience

Neutrosophic Sets and Systems, Vol. 88, 2025 Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva Vazquez, This volume of Neutrosophic Sets and Systems presents a collection of papers focused on the advanced studies and applications of neutrosophy neutrosophic set neutrosophic logic and neutrosophic statistics The research explores how these concepts generalize classical logic and fuzzy sets by incorporating a degree of indeterminacy The articles within this issue apply these theories to a wide range of fields including digital media art design decolonial thought rural legal aid education informatization public landscape design and cross border digital marketing The works demonstrate the use of neutrosophic frameworks to model complex uncertain and contradictory data offering new methods for decision making and problem solving in various domains
