## Frontiers Of Development Studies:

**The Frontiers of Development Studies** Paul Streeten, 1979 The Frontiers of Development Studies Paul Streeten, 1967 Critical frontiers of theory, research, and policy in international development studies, 2017 *Business of the State* Jewellord T. Nem Singh, 2024-06-26 As the world moves towards decarbonization and the race for clean energy technologies accelerates states in the global south are increasingly called upon to supply critical minerals to fuel the transition *Business of the State* details how mineral states might design effective growth strategies in this context of strategic competition and climate emergency via the rise of a hybrid developmental strategy during 1990s and 2010s the embrace of market conforming policies to attract FDI and the re assertion of state owned enterprises SOEs as players in industrial development Drawing from the experiences of Brazil's Petrobras and Chile's Codelco the book argues that SOEs might open new pathways for technological innovation and even support industrial policy if subjected to effective governance reforms and aligned with the private sector In this way the book shifts the analytical lens away from extractivism as a growth model and towards hybrid development strategies formulated through SOEs *Business of the State* asks fundamental questions about states and markets why do states seek to intervene in the affairs of public enterprises And what role might they play in structural transformation The book provides answers using a historical institutionalist framework process tracing the complex process of market reforms in highly strategic natural resource industries The Invisible Hand(out) Samuel Brazys, 2025-07-11 *The Invisible Hand out Aid Trade and Unequal Globalization* examines the relationship between foreign aid market access and economic growth in developing countries during the era of globalization Despite the rapid integration of global markets lifting millions of people out of poverty disparities remain with some nations thriving while others falter This book argues that explanations focusing solely on domestic governance and institutions or geography fall short in explaining these divergences Instead it highlights the critical role of external factors specifically the availability of trade effective aid and the presence of meaningful market access opportunities Drawing on extensive fieldwork and novel datasets the book offers both quantitative and qualitative evidence in support of its arguments Brazys considers a number of in depth cases including success stories Indonesia and Vietnam where strategic aid and market access drove transformative growth alongside cases including Madagascar and the Federated States of Micronesia who have stagnated despite high overall levels of aid and de jure market access With a focus on both economic data and the lived realities of development practitioners and exporters *The Invisible Hand out* bridges theoretical insights and practical implications offering policymakers academics and development professionals a fresh lens on addressing global inequality and fostering sustainable growth Border Studies Thomas M. Wilson, 2025-08-11 This multidisciplinary book provides a diverse overview of social science approaches to geopolitical borders social boundaries and cultural frontiers An array of esteemed specialists examine political imaginaries of border security and identify methodological innovations that will enhance future scholarly work in the field They also discuss

the multiplicity of borders with a view to addressing the question how far have we come The Economic Studies ,1979

**Politics and the Urban Frontier** Tom Goodfellow,2022 This book offers the first full length comparative analysis of urban development trajectories in Eastern Africa and the political dynamics that underpin them It offers a multi scalar historically grounded and interdisciplinary analysis of the urban transformations unfolding in the world s most dynamic crucible of urban change *Relevance of Development Studies to the Study of Change in Contemporary Britain* Lalage J. Bown, Mike Veitch, 1986 **Modern Ceylon Studies** ,1977 *The Rise and Fall of Neoliberal Rentier Capitalism* Luiz Carlos Bresser-Pereira, 2025-02-10 The Rise and Fall of Neoliberal Rentier Capitalism is an account of the political economy of capitalism in the 20th and 21st centuries Capitalism is an unjust form of economic organisation it is a culture of exacerbated individualism justified by the glorification of individual competition Today after 40 years of neoliberalism capitalism faces again a legitimation crisis The book discusses capitalism after two revolutions the Organisational Revolution and the Democratic Revolution It views capitalism since the New Deal in the US and the post war as a progressive and developmental era and the Neoliberal Turn as the change from social democracy to radical and regressive global neoliberalism which was a regressive time for almost forty years In the Neoliberal Years rentiers replaced entrepreneurs in the command of the economy and called on the financiers to manage their wealth and serve as organic intellectuals and both mounted an attack to the state which is the main capitalist institution The global crisis and in 2020 the Covid pandemic showed that the state remains the nations resource of last instance The transition of China from statism to an active developmentalism resulted in an extraordinary growth Given such realities in 2021 we saw the collapse of neoliberalism and in the United States a Developmental Turn the state is back in the economy The transition phase we live in is characterised by three main forces economic liberalism managerialism and democracy Economic liberalism is the great defeated managerialism became powerful and is developmental and democracy is the stronger force It was attacked by neoliberalism and is now being attacked by right wing populism but resisted and resists brilliantly proving that it was a conquest of the popular classes that became a universal value counting on the support of all social classes *Industry and Underdevelopment* Robert B. Sutcliffe, 1971 The Sociology of Developing Societies Ankie M. M. Hoogvelt, 1976 Sociology textbook on the social theory of underemployment considers the economic development strategies and future prospects of developing countries from the perspectives of capitalism and Marxism and discusses colonialism and social change etc References **Library of Congress Catalog** Library of Congress, 1970 A cumulative list of works represented by Library of Congress printed cards *The Spectre of State Capitalism* Ilias Alami, Adam D. Dixon, 2024-09-23 The state is back and it means business Since the turn of the 21st century state owned enterprises sovereign funds and policy banks have vastly expanded their control over assets and markets Concurrently governments have experimented with increasingly assertive modalities of statism from techno industrial policies and spatial development strategies to economic nationalism and trade

and investment restrictions This book argues that we are currently witnessing a historic arc in the trajectories of state intervention characterized by a drastic reconfiguration of the state's role as promoter supervisor shareholder investor and direct owner of capital across the world economy It offers a comprehensive analysis of this new state capitalism as commentators increasingly refer to it and maps out its key empirical manifestations across a range of geographies cases and issue areas Alami and Dixon show that the new state capitalism is rooted in deep geopolitical economic and financial processes pertaining to the secular development of global capitalism as much as it is the product of the geoeconomic agency of states and the global corporate strategies of leading firms The book demonstrates that the proliferation of muscular modalities of statist interventionism and the increasing concentration of capital in the hands of states indicate foundational shifts in global capitalism This includes a growing fusion of private and state capital and the development of flexible and liquid forms of property that collapse the distinction between state and private ownership control and management This has fundamental implications for the nature and operations of global capitalism and world politics This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations
