## **Economics Reader:**

*The Economic Reader* Massimo M. Augello, Marco E. L. Guidi, 2012-08-06 The book studies the origins and evolution of economic textbooks in the nineteenth and early twentieth century up to the turning point represented by Paul Samuelson's *Economics* 1948 which became the template for all the textbooks of the postwar period The case studies included in the book cover a large part of Europe the British Commonwealth the United States and Japan Each chapter examines various types of textbooks from those aimed at self education to those addressed to university students secondary school students to the short manuals aimed at the popularisation of political economy among workers and the middle classes An introductory chapter examines this phenomenon in a comparative and transnational perspective

**The Development Economics Reader** Giorgio Secondi, 2008 This book draws together the most authoritative articles on development economics published in the past few years is aimed at undergraduate level and is suitable for students with little or no background in economics The main themes include poverty foreign aid agriculture and human capital and amongst those whose work appears cannot be counted Amartya Sen Jeffrey Sachs Jagdish Bhagwati Joseph Stiglitz Paul Romer Dani Rodrik William Easterly Robert Barro Kenneth Arrow Hernando de Soto Daron Acemoglu Muhammad Yunus Anne Krueger Abhijit Banerjee Esther Duflo Michael Kremer and Martin Feldstein The reader focuses on the most recent and up to date contributions to the field of development economics Instead of collecting classic contributions which are already available through many sources the articles chosen reflect recent developments in the discipline for instance in the area of geography and development and include contributions that address recent events the dramatic resurgence of a debt relief movement The *Development Economics Reader* should be an invaluable resource for all students of the discipline

*Reader's Guide to the Social Sciences* Jonathan Michie, 2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense

**The Wealth of Nations** Adam Smith, 2010-08-30 THE MOST INFLUENTIAL BOOK ON MODERN ECONOMICS The *Wealth of Nations* is an economics book like no other First published in 1776 Adam Smith's groundbreaking theories provide a recipe for national prosperity that has not been bettered since It assumes no prior knowledge of its subject and over 200 years on still provides valuable lessons on the fundamentals of economics This keepsake edition is a selected abridgement of all five books and includes an Introduction by Tom Butler Bowdon drawing out lessons for the contemporary reader a Foreword from Eamonn Butler Director of the Adam Smith Institute and a Preface from Dr Razeen Sally of the London School of Economics

**The Reader's Index & Guide** Croyden Public Libraries, 1930

**Economics an Introduction for the General Reader (Classic Reprint)** Henry Clay, 2017-09-11 Excerpt from *Economics an Introduction for the General Reader* AN apology is needed for adding another to the large num

ber of books that attempt to deal with the whole subject matter of Economics in a single volume I offer two pleas in extenuation The first is that nearly all existing introductions to the subject are intended primarily for the University student The pious wish is generally expressed that they may be of use also to the general reader but the general reader's special needs and opportunities are seldom borne in mind His needs are different inasmuch as he has not the guidance of a teacher and the leisure of the student on the other hand his opportunities are some compensation for these disadvantages since he has usually a practical interest in the economic system and an experience of its working which the academic student lacks It seemed therefore worth while to try to do for the economic organization as a whole what Bagehot and Mr Hartley Withers have done for a part of it the credit system to explain the principles of its construction and working in the language of ordinary life and with reference to the experience and interests of the ordinary man While it would need a Bagehot to succeed I hope that the mere attempt will have done something to make it easier for the general reader to perceive the bearing of economic studies on the political and social problems in which he is interested About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
