Economy In Transition A System Of Models:

The Economy in Transition Gerhard Gehrig, 1995 This publication is a further result of a joint research with mainly W Welfe on economies in transition financed by the European Community To analyse and forecast the German economy a system of models for the old and new lands has been established Forecasts are done by simulations This part of the results contains a multi variate time series analysis and the West German money and capital market with 50 equations The demand for labour will be shown broken down to industries qualification levels and sex by 40 equations A sensitivity analysis has been applied to the structure of the model for the German economy In addition a simulation on an optimistic scenario shows the economic development of the two German economies up to the year 2000 Finally a model to connect foreign trade with the system of models shows an application for Poland and Slovakia also by a simulation

Economies in Transition Gerhard Gehrig, Władysław Welfe, 1993 Economies in Transition Gerhard Gehrig, Wladyslaw Welfe, 1993 It has been quite a challenge for econometricians to model economies in transition There is no textbook at hand to master that task Economic theory cannot be applied without adaptations to the characteristic change of a whole economic system Regression analysis taking into account past economic development only is of limited use for the econometrician Having econometric models at hand would be very helpful for an active economic policy to guide the transition process Various scenarios representing strategies could be simulated in their consequences to the economy The best alternative in respect to the government's objectives could be chosen This very situation has born the idea of co operation between Łódź and Frankfurt in 1990 There are problems of this kind in Poland and in Germany The German situation is somewhat better than that of Poland as a relatively small centrally planned economy is being united with a substantial social market economy taking over a lot of the burden of the former mismanagement Thus it might be possible to share the experience in modelling the united Germany and preparing forecasts with the Polish model builders In addition it would be profitable for both model establishing teams to link their models in order to improve the forecasting potential Moreover the Polish partner has a broad national and international experience in econometric model building which makes co operation smooth and fruitful His experience in modelling countries with a centrally planned economy would also help to master the transition problems

Mathematical Models of Economic Dynamics with Discrete Innovations Alexander J. Zaslavski, 2006 This monograph is devoted to an interesting class of dynamical systems arising in economic dynamics Dynamical systems theory has been a rapidly growing area of research which has various applications to physics engineering biology and economics In this theory one of the goals is to study the asymptotic behaviour of the trajectories of a dynamical system A discrete time dynamical system is described by a space of states and a sequence of transition operators which can be set valued Two types of dynamical systems are considered in the literature autonomous with a single transition operator which does not depend on time and non autonomous with transition operators depending on time In the monograph the authors discuss a number of results concerning this model which were obtained by the author in the last fifteen years They study the existence of trajectories on which consumption tends to infinity discuss the existence and structure of optimal solutions and analyse allocations of labour resources The authors introduce an optimality criterion for the trajectories of the model establish the existence of optimal trajectories and examine their structure They consider a multi product extension of the Makarov model and its extension with expenditures required for reallocation of labour resources

The Political Economy of Property Rights David L. Weimer, 1997-04-13 Originally published in 1997 The Political Economy of Property Rights reports on comparative research into the transformation of property rights in post communist countries and China Two important theoretical questions unify the contributions what aspects of political systems give credibility to systems of property rights What can be learned from the transformation of property rights in post communist countries about the large scale change of economic institutions The contributors consider the credibility of property rights as arising from the strategic interaction of political and economic actors and they apply this perspective and test its implications using a variety of qualitative and quantitative methods Overall the volume demonstrates the value of coordinated cross national research by area specialists sharing a common focus on questions of political economy

Circular Economy and Policy Sebastiano Patti, 2023-09-30 This book uses economic and policy approaches to highlight sustainability environmental and social aspects of the circular economy It emphasizes the circular economy within the market s perspective including the links between consumption and sustainability and how balances between profitability and environmental sustainability can be attained The author also uses a life cycle assessment approach to improve and evaluate circular economy strategies to help determine the environmental
