Feminists Doing Development:

Feminists Doing Development Marilyn Porter, Ellen R. Judd, 1999 Has feminism transformed development studies What happens to feminist theory and practice within the development industry This book brings together a variety of feminist activists and academics from both North and South engaged in development to answer these questions Each describes her project and its feminist rationale and analyses it through three fundamental challenges the problem of making a feminist agenda work within development agencies including the difficulties of finding funding and the constraints imposed by funders the ethical and methodological issues raised by feminism including the differences between women and the legitimacy of studying the Other the challenge of international feminism looking for new ways to work together for global change without imposing Western feminism on Southern women Including feminist projects from the South in the North the book explores how global feminism actually works in a variety of ways through both activism and academic research It is a fascinating insight into the challenges and rewards of feminist theory in practice As such it is necessary reading for practitioners policy makers activists and academics in gender and development as well as all students and academics of women's studies *Feminist Perspectives on Sustainable Development* Wendy Harcourt, 1994 This collection captures the vitality and urgency of feminists responses to the environment and development debate The authors researchers activists and policy makers from North and South offer new ways of challenging the present dominating knowledge systems and development institutions and discuss the difficulties women face on the margins of the development process Contributions on resource management power knowledge production culture development institutions and politics health and economics show how gender relations are not simply a footnote to our understanding of history and societies but must be central to the development discourse In so doing they suggest that diversity itself is necessary to the creation of new paradigms of development that are built upon gender equity secure livelihoods ecological sustainability and political participation

Feminisms, Empowerment and Development Jenny Edwards, Andrea Cornwall, 2014-03-13 The economic and political empowerment of women continues to be a central focus for development agencies worldwide access to medical care education and employment as well as women's reproductive rights remain key factors effecting women's autonomy *Feminisms Empowerment and Development* explores what women are doing to change their own personal circumstances whilst providing an in depth analysis of collective action and institutionalized mechanisms aimed at changing structural relations Drawing on unique original research and approaching empowerment as a complex process of negotiation rather than a linear sequence of inputs and outcomes this crucial collection highlights the difficulty of creating common agendas for the advancement of women's power and rights and argues for a more nuanced context based approach to development theory and practice An indispensable text for anyone interested in gender and development this book shows that policies and approaches to development that view women as instrumental to other objectives will never promote women's empowerment

as they fail to address the structures by which gender inequality is perpetuated over time *Feminism* Correa Moylan Walsh, 1917 **Development, Women, and War** Haleh Afshar, Deborah Eade, 2004 Surveys feminist approaches to peacebuilding and conflict resolution Covers conflicts in the Middle East Africa and Eastern Europe Policy makers practitioners and academics discuss long running conflicts in the Middle East Africa and Eastern Europe They highlight the shared experiences of women and their potential to contribute both to war and to peace Chapters survey feminist approaches to peace building and conflict resolution and present concrete policy measures to achieve these ends Underlying all the essays in this volume is a sense of the need to understand gendered power relations and the dynamics of social change

The Journal of Race Development, 1917 Women, the Environment and Sustainable Development Rosi Braidotti, International Research and Training Institute for the Advancement of Women, 1994 There is a widespread perception that the development process is in a state of multiple crisis While the notion of sustainable development is supposed to address adequately its environmental dimensions there is still no agreed framework relating women to this new perspective This book is an attempt to present and disentangle the various positions put forward by major actors and to clarify the political and theoretical issues that are at stake in the debates on women the environment and sustainable development Among the current critiques of the Western model of development which the authors review are the feminist analysis of Science itself and the power relations inherent in the production of knowledge Women Environment and Development WED Alternative Development Environmental Reformism and Deep Ecology Social Ecology and Ecofeminism In traversing this important landscape of ideas they show how they criticise the dominant development model at the various levels of epistemology theory and policy The authors also go further and put forward their own ideas as to the basic elements they consider necessary in constructing a paradigmatic shift emphasising such values as holism mutuality justice autonomy self reliance sustainability and peace This unique work is a signally useful contribution to clarifying thinking on a topic with immense implications for all women **Life and Light for Heathen Women**, 1897 **Feminist Perspectives on Sustainable Development** Wendy Harcourt, 1994 This collection captures the vitality and urgency of feminists responses to the environment and development debate The authors researchers activists and policy makers from North and South offer new ways of challenging the present dominating knowledge systems and development institutions and discuss the difficulties women face on the margins of the development process Contributions on resource management power knowledge production culture development institutions and politics health and economics show how gender relations are not simply a footnote to our understanding of history and societies but must be central to the development discourse In so doing they suggest that diversity itself is necessary to the creation of new paradigms of development that are built upon gender equity secure livelihoods ecological sustainability and political participation **The American Journal of Obstetrics and Diseases of Women and Children**, 1903 **Pictorial Review**, 1914 Includes music Feminist Ethics Claudia Card, 1991 Fifteen

Veeder,1992-07-30 Essential characteristics of women s decision making have long been ignored or if considered at all have
been viewed in relationship to male based factors Veeder drawing on experiences of Irish women establishes that women
making important choices do so differently than men The women ranging in age from as young as thirteen to over sixty five
were divided into three age groupings thereby offering insights into variables over much of the life span Themes born from
common experiences emerge from the poignant compelling accounts of individual women The author s analysis and
commentary structure the book s development and maintain its focus on the context wherein women make their private but
immensely important decisions the family Education vocation marriage and childbearing are considered relative to the
thought and emotional factors that influenced the women s decisions Veeder concludes that women show strength and
insight in their approach to choices She sees women in comparison with men as taking more factors into consideration being
more aware of consequences being more practical flexible and valuing of relationships Women s participation in the
workforce and their increased societal roles make this a most timely book It is too an important contribution to and stimulus

Chaudhuri,2005-03-04 This collection is an invaluable overview of the rich history of Indian feminism It brings together the
writing of prominent Indian academics and activists as they debate feminism in the context of Indian culture society and
politics and explore its theoretical foundations in India The inevitable association with western feminism the status of women
in colonial and independent India and the challenges to Indian feminism posed by globalization and the Hindu Right are
discussed at length It deepens our understanding of why despite the existence of legal and constitutional rights women are
