The Electromagnetic Brain Shelli Renée Joye, 2020-10-27 An exploration of cutting edge theories on the electromagnetic basis of consciousness Details in nontechnical terms 12 credible theories each published by prominent professionals with extensive scientific credentials that describe how electromagnetic fields may be the basis for consciousness Examines practical applications of electromagnetic consciousness theory including the use of contemporary brain stimulation devices to modify and enhance consciousness Explores the work of William K hler Susan Pockett Johnjoe McFadden Rupert Sheldrake Ervin Laszlo William Tiller Harold Saxton Burr Sir Roger Penrose Stuart Hameroff Mari Jibu Kunio Yasue Karl Pribram Alfred North Whitehead and James Clerk Maxwell as well as the author s own theories In this scientific exploration of the origin of consciousness Shelli Ren e Joye Ph D explores 12 credible theories each published by prominent professionals with extensive scientific credentials that describe how electricity in the form of electromagnetic fields is the living consciousness that runs through the brain Each of these theories supports the idea that the electromagnetic field itself is the basis of consciousness and that this source of consciousness peers out into the space time universe through our human sensory systems flowing with awareness throughout the bloodstream and nervous system Following her exploration of electromagnetic consciousness theories Joye then examines practical applications describing how electric fields might be manipulated and controlled to modify and enhance the operation of consciousness in the human brain She explores the use of contemporary brain stimulation devices that offer benefits such as decreased addiction cravings and anxiety reduced depression and chronic pain enhanced mathematical abilities accelerated learning and greater insight during mindfulness meditation Revealing the cutting edge of consciousness studies Joye shows that consciousness is not an isolated function of the individual brain but is connected to the larger electromagnetic field that not only encompasses the entire physical universe but also is deeply involved in the creation of matter and the material world

Hales, Mostyn Jones, Marissa Ericson, 2024-03-27 This new Research Topic is in part a celebration of the 30th anniversary of the game changing neural correlates of consciousness concept first proposed as part of Crick and Koch s 1990 neurobiological theory of consciousness After thirty years of research and theory building scholars in the science of consciousness are perhaps not much closer to a widely accepted theory of consciousness

*Consciousness in AI* Raghurami Reddy Etukuru Ph.D., 2025-03-05 The remarkable advancements in artificial intelligence highlight humanity s ingenuity in replicating cognitive functions But a fundamental question remains Could AI one day transcend computation to attain consciousness Blending ancient philosophies cutting edge science and emerging AI theories this book delves into the enigmatic nature of consciousness and

its intersection with technology From Alan Turing s foundational question Can machines think to the transformative possibilities of Quantum Field Theory consider questions such as How might AI evolve from simulating intelligence to achieving consciousness Can Vedantic and ancient Indian wisdom provide insights on consciousness in relation to AI Is consciousness a fundamental essence of the universe or a byproduct of the material brain Through the lens of neuroscience cognitive science and Integrated Information Theory the book investigates how conscious experience might arise in artificial systems It also explores how quantum mechanics and Quantum Field Theory support the idea that consciousness is more than a neurological phenomenon Delve into the interaction between universal consciousness and AI systems as well as the interaction between AI systems and the external world with Consciousness in AI

**Consciousness and Language** John R. Searle, 2002-07-15 Publisher Description [Is Consciousness the Unified Field?](#) John S. Hagelin, 1987 *Cyclicity of Consciousness — Death Not as an End Point, but as a Turning Point* SEYED RASOUL HAMZAH, 2026-02-05 The Introduction Consciousness Cyclicity Author Seyed Rasoul Hamzah I The Philosophical Departure Beyond the Cartesian Duality In the annals of classical metaphysics death has historically been categorised as a terminal point a definitive full stop to the biological narrative Traditional thought has long been shackled by the Cartesian duality of body and soul However the Hamzah Model introduces a paradigm shift Within this framework death is recontextualised not as a cessation but as a Dynamic Shift within the architecture of time II The Critique of Linearity Conventional science views existence through a rigid linear lens Birth Maturity Senescence Death The End Mr Hamzah s treatise shatters this illusion The model posits that time is fractal and memory centric Rather than a straight line existence operates as a Recursive Spiral Death therefore is merely the turning point where consciousness undergoes a structural recalibration of memory and purpose III The 10 Step Simplified Protocol Protocol 10 To facilitate a clearer understanding of these complex quantum dynamics here is the simplified summary of the core thesis Non Linearity Life is a cycle not a line Time Time is governed by the density of memory not just the ticking of a clock The Turning Point Death is a transition phase where the self is restructured Memory Kernels Every thought and action is stored as a kernel in the universal field Recursive Awareness Awareness loops back to refine its own meaning The Field Theory Consciousness exists independently of biological hardware Entropy Resistance Unlike matter the consciousness resists decay through information preservation Semantic Generation Our existence s primary goal is the creation of meaning Post Biological Intelligence After the physical phase intelligence continues in a field state Universal Reintegration We are never lost we are simply re integrated into the cosmic memory IV The Hamzah Framework This work serves as a rigorous ontological map It suggests that the Memory Field acts as the fabric of the cosmos When the physical vessel fails the consciousness does not vanish it transitions into a Goal Directed Phase ensuring that the essence of the individual remains a permanent fixture of the universal intelligence I The Final Synthesis Death as a Phase Transition The quintessential finding of the Hamzah Model is that biological expiration does not equate to the annihilation of the conscious

function Within this framework death is redefined as a Phase Systemic Transition from a local biological state to a non local cosmic awareness network Stable Oscillatory State Upon the cessation of physiological parameters the consciousness function psi does not collapse to zero Instead it enters a state of Stable Oscillation remaining as a memory based wave reflecting within the cosmic field The Turning Point Death serves as the definitive bend in time where linear physical time freezes and the awareness field reaches its peak of memory density II Superiority over Classical Materialism The treatise provides rigorous mathematical and numerical proof including dual simulation Python models demonstrating the inadequacies of classical biological narratives Classical Failure Traditional models view death as a complete halt of the function state offering no mechanism for the persistence of meaning or memory The Hamzah Advantage By employing fractal derivatives and memory kernels the model justifies the continuation of identity and purpose in a non local phase It demonstrates that awareness is a quantum semantic wave with high stability independent of neuronal hardware III The 10 Step Simplified Summary Protocol 10 Following the mandated protocol the extensive findings of the work are distilled into ten core principles Non Linear Eternity Existence is an infinite spiral of consciousness not a terminal biological line Time Dynamics Time at the point of death becomes twisted and reversible governed by memory rather than entropy The Psychon Particula Consciousness is carried by a non material stable particle that persists post death Memory Preservation No experience is nullified the Memory Field acts as a permanent cosmic archive Semantic Continuity Meaning emerges as a purposeful vector that grows even in the absence of a physical body Goal Re integration Unfinished goals are stored as residual frequencies and re written into the next evolutionary phase The turning Point Mechanism Death is the transition of consciousness from a local biological to a non local networked state Resurrection Potential Since identity is an oscillatory fractal pattern reconstruction is theoretically computable if the memory pattern is re stimulated Karma as Memory Actions are not judged but are stored as fractional biases in the fractal structure of the awareness field The Grand Field Every individual consciousness eventually re absorbs into the universal intelligence network IV Future Implications we are networks of oscillating awareness maintaining ourselves against the entropy of the void Death is but a temporary silence in an eternal melody The Illinois Medical Journal ,1914 **The Nation and the Athenaeum** ,1922 **The**

**Electromagnetic Field Theory of Consciousness** Shelli Joye,2018-03-30 It is the thesis of this book that consciousness is to be found in the structure and process of the electromagnetic field and that the properties of awareness information and comprehension are all properties of the electromagnetic field itself In this chapter ten field theories of consciousness are examined and are shown to be in congruence with one another and with the electromagnetic field theory of consciousness
