Fierce Water Creatures:

God of Desire Catherine Benton, 2006-06-01 *God of Desire* presents Sanskrit tales of the Indian deity Kamadeva as he battles the ascetic god Iva. Iva assists the powerful goddess Dev and incarnates as the charming son of Kamadeva. Exploring the imagery and symbolism of the god of desire in art and ritual, Catherine Benton reflects on the connection of Kamadeva to parrots, makaras, gharials, and apsaras, celestial nymphs, and to playful devotional rituals designed to win his favor. In addition to examining the Hindu literature, Benton also highlights two Buddhist forms of Kamadeva: the demonic Mura who tries to persuade the Buddha to trade enlightenment for the delights of a woman, and the ever youthful Manjuri who cuts through ignorance with the bodhisattva sword of wisdom. Tales of Kamadeva from the Hindu and Buddhist traditions present desire as a powerful force continually redefining the boundaries of chaos and order, and gently pulling beyond the ephemeral lure of passionate longings.

Between the mid-eighteenth and the early twentieth centuries, the philosophical legacy of the Enlightenment, the mechanical inventions of the Industrial Revolution, and the intellectual transformation sparked by Charles Darwin undermined many of the traditional roles assigned to animals and overturned our view of them as physically, mentally, and divinely separated from humans. This book interweaves the history of science and of art in an account of how humans came to understand and appreciate their shared biological ancestry. *Fierce Friends* explores how painters, sculptors, illustrators, and ceramists reflected contemporary changes in the perception of animals, incorporating in their work the latest developments in geographical exploration and comparative anatomy, advances in geology, and the birth of paleontology. The enthusiasm of

amateur naturalists and the impact of evolution theory It identifies the importance of illustrators such as Audubon who were frequently at the forefront of natural history discoveries and reveals the visionary artists who drew imaginatively on Darwin's theory of natural selection to create mythical beasts Artists as diverse as Hogarth Oudry Gericault Delacroix and Van Gogh here demonstrate mankind's increasing awareness of animals as sentient creatures infusing genres such as animalier painting and portraiture with new meaning and emotional power
