Mennes,2025-10-01 This volume presents a first introduction to a thought provoking Model of Motivation developed by Menno Mennes over a period of almost thirty years The Model of Motivation in its approach presents a radical departure from everything that has appeared so far in literature on the subject And yet it provides a surprisingly detailed account of how motivation works which appears to be supported by findings from theories and research from current literature In an unparalleled analysis the Model seamlessly integrates these major theories into a consistent comprehensive approach to motivation explaining not only the essentials of each theory but also providing explanations for controversies that have hitherto remained largely unresolved Motivation appears to be an inner dialogue a stepwise partly cyclical Process in which we deal with our surroundings that often interfere in our ambitions our wishes and desires Deep personal insights into those Mechanisms of the Mind reveal implications that may lead to a fundamental new understanding of the origins of many disturbing issues we witness in present day society including neglect and denial intolerance discord and polarization
