

LAYERING OF HIGH FIRE CONE 4/6 GLAZES

All of the bells shown were created by layering two glazes together (with the exception of three metallic finishes which were accomplished with just one glaze). On each of the bells the glaze number to the left has been applied in one coat to the top half of the bell. When this glaze was dry the glaze number to the right has been applied in two coats over the entire bell. Glazes numbered in the 900 & 800 series were fired to cone 05. Glazes numbered in the 1100 series were fired to cone 5.
