Lamm, 1985 **The Global Economic Mismatch** Henry B. Schechter, 1993-08-30 In this study labor economist Henry Schechter concludes that there is

a need for greater international prohibitions and for keeping open channels for collective bargaining for higher wages He presents an analysis of recent changes in the United States and elsewhere highlighting the spread of automated production technology to lesser developed low wage areas of the world which leads to global demand supply imbalances and downward pressure on wages This circumstance he charges is aggravated as multinational corporations affiliate with one another lessening competition and increasing monopolistic influences worldwide This work will be of interest to the scholars and policymakers in academia government business and the labor movement concerned with fiscal and labor economic policies

Future Survey ,1985 *World Bulletin* ,1991 **International Relations** Conway W. Henderson,1998 This text is a distinctly post Cold War learning tool that will help make sense of the rapid changes now taking place in international relations The author s goal is to contribute to an understanding of a world more willing to abide by rules and norms especially as expressed in international law and a world shifting to an emphasis on the soft power of economic influence rather than relying on the hard power of military force While this text is cautiously optimistic about humankind s future as we enter the 21st century it warns about continuing turbulence caused by terrorism rogue states intense trade competition ethnic conflict and the antagonism between rich and poor states The chapters are tied together with an overarching theme that argues the world is moving from an international anarchy based on fear and military power to the early stages of an international society comprised of multiple actors cooperating to solve problems they handle on their own **Host**
