We Lost the War on Cancer - Review of Alternative Cancer Therapies John P. Thomas, 2014-08-25 We have lost the war on cancer At the beginning of the last century one person in twenty would get cancer In the 1940s it was one out of every sixteen people In the 1970s it was one person out of ten Today one person out of three gets cancer in the course of their life The cancer industry is probably the most prosperous business in the United States In 2014 there will be an estimated 1 665 540 new cancer cases diagnosed and 585 720 cancer deaths in the US 6 billion of tax payer funds are cycled through various federal agencies for cancer research such as the National Cancer Institute NCI The NCI states that the medical costs of cancer care are 125 billion with a projected 39 percent increase to 173 billion by 2020 The simple fact is

that the cancer industry employs too many people and produces too much income to allow a cure to be found All of the current research on cancer drugs is based on the premise that the cancer market will grow not shrink John Thomas explains to us why the current cancer industry prospers while treating cancer but cannot afford to cure it in Part I In Part II he surveys the various alternative cancer therapies that have been proven effective but that are not approved by the FDA

Conspiracies of Conspiracies Thomas Milan Konda,2022-12-22 The most comprehensive intellectual history of American conspiracy theories yet produced The American Historical Review It s tempting to think we live in an unprecedentedly fertile age for conspiracy theories with seemingly each churn of the news cycle bringing fresh manifestations of large scale paranoia But the sad fact is that these narratives of suspicion and the delusional psychologies that fuel them have been a constant presence in American life for nearly as long as there s been an America In this sweeping book Thomas Milan Konda traces the country s obsession with conspiratorial thought from the early days of the republic to our own anxious moment Conspiracies of Conspiracies details centuries of sinister speculations from antisemitism and anti Catholicism to UFOs and reptilian humanoids and their often incendiary outcomes Rather than simply rehashing the surface eccentricities of such theories Konda draws from his extraordinary assemblage of conspiratorial writing to crack open the mindsets that lead people toward these self sealing worlds of denial What is distinctively American about these theories he argues is not simply our country s homegrown obsession with them but their ongoing prevalence and virulence Konda proves that conspiracy theories are no harmless sideshow They are instead the dark and secret heart of American political history one that is poisoning the bloodstream of an increasingly sick body politic Meticulous scholarship essential context for understanding our present mess Survival Global Politics and Strategy Incisive and engaging Konda s assessment of the new dynamics of conspiracy theories in contemporary US politics is a significant contribution Written with a clarity of expression rare in academic writing the book is accessible to a wide readership Choice **Logically Vol. I - The great lies about**
