Forced Migration and the Contemporary World Andrzej Bolesta,2003 **Globalistics and globalization studies**
Leonid E. Grinin,Ilya V. Ilyin,Peter Herrmann,Andrey V. Korotayev,2016-01-01 The present volume is the fifth in the series of yearbooks with the title Globalistics and Globalization Studies The subtitle of the present volume is Global Transformations and Global Future We become more and more accustomed to think globally and to see global processes And our future can all means be global However is this statement justified Indeed in recent years many have begun to claim that globalization has stalled that we are rather dealing with the process of anti globalization Will not we find ourselves at some point again in an edifice spanning across the globe but divided into national apartments separated by walls of high tariffs and mutual suspicion Of course some setbacks are always possible because the process of globalization cannot develop smoothly It is a process which is itself emerging from contradictions and is shaped by a new contradiction They often go much further than underlying systemic changes allow They break forward as the vanguard of a victorious army and then often meet resistance of various social and political forces and may suddenly start to roll back just at the moment when everyone expects their further offensive We believe that this is what is happening with globalization at present The yearbook will be interesting to a wide range of researchers teachers students and all those who are concerned about global issues **International Social Work** David Cox,Manohar Pawar,2012-12-04 International Social Work Issues Strategies and Programs Second Edition draws together the practice wisdom emerging within the broad scope of international social work practice and its role in contributing to the international community s efforts in combating the major global social problems of poverty conflict and postconflict reconstruction the development of countries and disadvantaged populations migration and displacement and the needs of specific populations such as child soldiers and AIDS orphans Utilizing an integrated perspectives approach incorporating global human rights ecological and social development perspectives the International Social Work 2e is designed to prepare social workers human services professionals development practitioners who desire to play significant roles in responding to modern global challenges that are critical to the well being of people communities nations and ultimately of us all Research Handbook on the Sociology of Globalization Christian Karner,Dirk Hofäcker,2023-07-01 This Research Handbook takes stock of the state of the art in sociological research on globalization and the contributors outline future trajectories for this one of the most pressing and challenging sociological themes of our time Forcible Displacement Throughout the Ages Grant Dawson,Sonia Farber,2012-07-19 This book analyses the anthropological historical and legal contours of the crime of forcible displacement and proposes specific measures that the international community can adopt in order to prevent and or punish the perpetration of the crime in the future **Rethinking Security in the Age of Migration** Ali Bilgic,2013-09-02 Migration and especially irregular migration are politically sensitive and highly debated issues in the developed world particularly in Europe This book analyses irregular protection seeking migration in Europe

with close attention to sub Saharan migration into the EU from the perspective of emancipatory security theory Some individuals leave their countries because political social and economic structures largely fail to provide protection This book examines how communities respond to migrants who seek protection and security where migration is perceived as a source of insecurity by many in that community The central aim of this critical analysis is to explore ideas and practices which can contribute to replacing the political structures of insecurity with emancipatory structures where individuals both irregular migrants and members of the receiving communities enjoy security together not opposed to each other Drawing on the security dilemma critical approaches to security forced migration and trust the book demonstrates how common life between two groups of individuals can be politically constructed in tandem with limitations risks and possible handicaps of initiating such a construction in world politics Rethinking Security in the Age of Migration will be of interest to students and scholars of migration studies security studies international relations European politics and sociology Asian and Pacific Migration Journal ,2006 *Forced Migration* Alice Bloch, Giorgia Dona, 2018-08-15 *Forced Migration Current Issues and Debates* provides a critical engagement with and analysis of contemporary issues in the field using inter disciplinary perspectives through different geographical case studies and by employing varying methodologies The combination of authors reviewing both the key research and scholarship and offering insights from their own research ensures a comprehensive and up to date analysis of the current issues in forced migration The book is structured around three main current themes the reconfiguration of borders including virtual borders the expansion of prolonged exile and changes in protection and access to rights The first chapters in the collection provide both context and a theoretical overview by situating current debates and issues in their historical context including the evolution of field and the impact of the colonial and post colonial world order on forced migration and forced displacement These are followed by chapters framed around substantive issues including deportation and forced return protracted displacements securitising the Mediterranean and cross border migration practices refugees in global cities forced migrants in the digital age and second generation identity and transnational practices *Forced Migration* offers an original contribution to a growing field of study connecting theoretical ideas and empirical research with policy practice and the lived experiences of forced migrants The volume provides a solid foundation for students academics and policy makers of the main questions being asked in contemporary debates in forced migration *The Postcolonial Age of Migration* Ranabir Samaddar, 2020-05-11 This book critically examines the question of migration that appears at the intersection of global neo liberal transformation postcolonial politics and economy It analyses the specific ways in which colonial relations are produced and reproduced in global migratory flows and their consequences for labour human rights and social justice The postcolonial age of migration not only indicates a geopolitical and geo economic division of the globe between countries of the North and those of the South marked by massive and mixed population flows from the latter to the former but also the production of these relations within and among the countries of the North The book discusses issues such

as transborder flows among countries of the South migratory movements of the internally displaced growing statelessness leading to forced migration border violence refugees of partitions customary and local practices of care and protection population policies and migration management both emigration and immigration the protracted nature of displacement labour flows and immigrant labour and the relationships between globalisation nationalism citizenship and migration in postcolonial regions It also traces colonial and postcolonial histories of migration and justice to bear on the present understanding of local experiences of migration as well as global social transformations while highlighting the limits of the fundamental tenets of humanitarianism protection assistance security responsibility which impact the political and economic rights of vast sections of moving populations Topical and an important intervention in contemporary global migration and refugee studies the book offers new sources interpretations and analyses in understanding postcolonial migration It will be useful to scholars and researchers of migration studies refugee studies border studies political studies political sociology international relations human rights and law human geography international politics and political economy It will also interest policymakers legal practitioners nongovernmental organisations and activists
