## Forces For Change In Contemporary China:

**Forces for Change in Contemporary China** James T. Myers, Bih-jaw Lin, 1992 [Forces for Change in Contemporary China](#) Bih-jaw Lin, James T. Myers, 1992 *Force and Contention in Contemporary China* Ralph A. Thaxton, Jr, 2016-08-04 Why is contemporary China such a politically contentious place Relying on the memories of the survivors of the worst catastrophe of Maoist rule and documenting the rise of resistance and protest at the grassroots level this book explains how the terror hunger and loss of the socialist past influences the way in which people in the deep countryside see and resist state power in the reform era up to the present day repression of the People's Republic of China central government Ralph A Thaxton Jr provides us with a worm's eye view of an unknown China a China that cannot easily or fully be understood through made in the academy theories and frameworks of why and how rural people have engaged in contentious politics This book is a truly unique and disturbing look at how rural people relate to an authoritarian political system in a country that aspires to become a stable world power **The SAGE Handbook of Contemporary China** Weiping Wu, Mark Frazier, 2018-07-09 The study of contemporary China constitutes a fascinating yet challenging area of scholarly inquiry Recent decades have brought dramatic changes to China's economy society and governance Analyzing such changes in the context of multiple disciplinary perspectives offers opportunities as well as challenges for scholars in the field known as contemporary China Studies The SAGE Handbook of Contemporary China is a two volume exploration of the transformations of contemporary China firmly grounded in the both disciplinary and China specific contexts Drawing on a range of scholarly approaches found in the social sciences and history an international team of contributors engage with the question of what a rapidly changing China means for the broader field of contemporary China studies and identify areas of promising future research Part 1 Context History Economy and the Environment Part 2 Economic Transformations Part 3 Politics and Government Part 4 China on the Global Stage Part 5 China's Foreign Policy Part 6 National and Nested Identities Part 7 Urbanization and Spatial Development Part 8 Poverty and Inequality Part 9 Social Change Part 10 Future Directions for Contemporary China Studies *Twentieth Annual Sino-American Conference on Contemporary China, Forces for Change* , 1991 [Mao Zedong and Contemporary China](#) Katsuji Nakagane, 2024-05-11 What did Mao Zedong bring to China Mao Zedong a rare leader who is still regarded as a great hero on the Chinese continent despite the large number of victims caused by the Great Leap Forward and the Cultural Revolution He called himself Qin Shi Huang First Emperor of Qin plus Marx It can be said that he is an entity that combines the power of the emperor and the authority of Marx into one person This book analyzes the features of Mao Zedong's thought and philosophy his understanding of Marxism and class struggle in particular his peculiar attitude toward intellectuals his actions leading to the Great Leap Forward and the Cultural Revolution which he initiated and involved the entire nation as well as the analysis of the mechanisms that caused such catastrophes and tragedies Finally through these analyses this book attempts to evaluate Mao Zedong with diverse

personalities and his behavior positive and negative whether in political social economic or philosophical areas

Interpreting China's Military Power Ka Po Ng, 2005-08-09 Although inter state tensions have generally been easing after the Cold War military power remains a dominant factor in Asian regional politics As China operating the world s largest army grows stronger there are ongoing debates over the implications for Asia s regional security This book argues that it is imperative to look beyond the empirical observations and conventional materialist reading of Chinese military development to understand its dynamics and directions in doctrinal terms and put it in a readiness context for evaluation Military doctrine has long been under studied and is often treated as a subject separate from force development But as this study contends this factor is necessary for interpreting the making and purposes of China s military power because it forms the intellectual foundation of military structural and hardware development When loaded with political rhetoric it also communicates to us the intended uses of the military power The role of doctrine is reinforced in the context of military readiness which defines what for and how the army is getting ready Force development is evaluated in structural operational and directional terms The importance of this analytical framework based on military doctrine and readiness is demonstrated in a survey of the evolution of Chinese military doctrine and force development As the Chinese People s Liberation Army has continued to adjust its military structure and operation to follow the doctrinal lead its switches between the doctrines of local war and total war have seen corresponding changes to the emphasis between operational and structural readiness

*Social Change in Contemporary China* Wenfang Tang, Burkart Holzner, 2007 *Social Change in Contemporary China* offers a wide ranging examination of Chinese institutional change in areas of education religion health care economics labor family and local communities in the post Mao era Based on the pioneering work of sociologist C K Yang 1911 1999 and his institutional diffusion theory the essays analyze and develop the theory as it applies to both public and private institutions The interrelationship of these institutions composes what Yang termed the Chinese system and affects nearly every aspect of life Yang examined the influence of external factors on each institution such as the influence of Westernization and Communism on family and the impact of industrialization on rural markets He also analyzed the impact of public opinion and past culture on institutions therein revealing the circular nature of diffusion Perhaps most significant are Yang s insights on the role of religion in Chinese society Despite the common perception that China had no religion he uncovers the influence of classical Confucianism as the basis for many ethical value systems and follows its diffusion into state and kinship systems as well as Taoism and Buddhism Writing in the early years of Communism Yang had little hard data with which to test his theories The contributors to this volume expand upon Yang s groundbreaking approach and apply the model of diffusion to a rapidly evolving contemporary China providing a window into an increasingly modern Chinese society and its institutions

**Sun Yat Sen and the birth of modern China** Nick Shepley, 2015-12-07 As the increasingly powerless Qing Dynasty in 19th Century China struggled to defend itself from European American and Japanese colonial control and bloody civil wars and

rebellions fought by an angry and desperate people raged a new revolutionary force emerged Sun Yat Sen s Tongmenghui later known as the Kuomintang adopted the revolutionary ideas of the west but in a bid to sweep away not only the weak Qing Dynasty but the western powers that had brought China to her knees This is the first ebook in a series of three that explores the dramatic changes that have shaped the Chinese 20th Century and look set to shape the 21st Explaining History Ebooks are a series of short concise detailed and in depth ebooks that examine each chapter of the 20th Century in totality ideal as an introduction to new historians or a companion to regular history readers

**In Search of Civil Society** Gordon White, Jude Howell, Xiaoyuan Shang, 1996 Since 1978 China has pursued sweeping economic changes in an officially sponsored transition from a Stalinist centrally planned economy to a socialist market economy China s reformers have highlighted the need to curb the awesome power of the Leninist state and change the balance of power between state and economy state and society In practice the economic reforms have set in train a process of potentially fundamental social and institutional change in China which is creating new socio economic forces shifting power in their direction and raising the possibility of political transformation This book explores the extent to which this experience can be described and understood in terms of the idea of civil society defined in sociological terms as the emergence of an autonomous sphere of voluntary associations capable of organizing the interests of emergent socio economic groups and counterbalancing the hitherto unchallenged dominance of the Marxist Leninist state the authors lay out a clear operational definition of the concept of civil society to make it useful as a tool for empirical inquiry and avoid the cultural relativism of its origins in Western historical experience Guided by this theoretical framework the book brings together a vast amount of empirical data on emergent social organization and institutions in contemporary China drawing on the authors extensive fieldwork experience in East Asia It is based on interviews survey questionnaires and copious documentary sources buttressed by in depth case studies of specific localities over a two year period from 1991 to 1993 the research focused on the changes in the socio economic realities of three major social groups urban manual workers women and managers entrepreneurs The primary emphasis is on transformations in urban China though detailed rural case studies of Xiaoshan and Nanhai are included to provide comparative context The authors describe the new forms of state society relations as reflected in the complex links between the state and new associations They show how the expansion of these associations is jeopardized by the lack of general democratization of China s political institutions

*China in and Out of the Changing World Order* Samuel S. Kim, 1991

Social Change and Social Policy in Contemporary China Linda Wong, Stewart MacPherson, 1995 Since Mao s demise China has embraced economic modernization with a vengeance The stunning growth that followed the reforms and the effects on her political institutions has captured world attention Nevertheless there has been a dearth of studies on social change and social policy in this period of rapid transition This text scrutinizes the social change process and the reform challenge assesses the social policy responses and analyzes key policy issues affecting China s 1.2 billion people It not only

offers an indepth dissection of the subject but also draws out salient points in the policy and development debates and places the Chinese experience in a comparative perspective All the contributors are academics from Hong Kong who have drawn upon many years of research in China and skills of social policy analysis to offer a unique review of social developments in the world s number three economic power
