The Framework of Operational Warfare Clayton Newell, 1991-07-04 First published in 1991 Routledge is an imprint of Taylor Francis an informa company

The Cold War U.S. Army Ingo Trauschweizer, 2008 Focuses on the Seventh Army in West Germany the largest and best prepared field army ever deployed by the U S in peacetime to show how the U S army redefined its identity structure and mission in order to avoid obsolescence during the Cold War era of nuclear weapons and air power

Operational End State Frederic E Abt, 2025-05-22 This monograph examines the criticality of the operational end state to the conduct of operational warfare through a theoretical and historical analysis from which conclusions concerning current doctrinal treatment of the operational end state are drawn The theoretical basis for the operational end state begins with the development of linkage between tactical military action and political strategic goals found in the theoretical writings of Clausewitz and Jomini Their treatment of this subject is reaffirmed by twentieth century military writers such as Lasswell Huntington and Brodie An historical analysis of U S military actions since the end of WWII is then presented to determine the validity of theory concerning the criticality of the operational end state to the successful achievement of national strategic goals Several military actions have been chosen as representative of the application of military force to achieve U S strategic goals the Korean Conflict the 1961 Cuban Bay of Pigs the 1965 Dominican Republic Intervention and the Vietnam War This monograph finds that historical actions validate theoretical concepts concerning the criticality of the operational end state in the proper conduct of operational warfare This criticality is reflected in developing U S operational doctrine through an emphasis upon end state development as the first step in constructing a framework for the successful conduct of operational warfare This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

[A Framework for Planning the Employment of Air Power in Theater War](#) Edward L. Warner, 1984 This Note argues for the utility of developing and adhering to an explicit overall framework to guide the use of air power in support of U S military strategies It offers a

conceptual framework to inform Air Force planning for the development of concepts of operations that can assist in acquisition of equipment and the formation of organizational elements The main feature of the framework is its identification of the range of functions surveillance assessment command control asset generation and engagement attack that must be executed sequentially and repetitively to perform effectively key air power missions The framework can be used to develop concepts of operations for the application of air power across the full range of strategic and tactical missions In this Note however discussion is confined to its applicability in the context of a major theater conflict fought with conventional weapons

The A to Z of the Persian Gulf War 1990 - 1991 Clayton R. Newell, 2007-02-15 Contrary to many assessments that immediately followed the end of the 1991 Persian Gulf War that war was neither short nor decisive The 1991 conflict was the dramatic manifestation of long standing antagonisms among the principal participants and its results continue to have a profound effect on the region a fact that can be seen most clearly in the current U S occupation of Iraq It is therefore important to determine on the diplomatic side just how the war got started how it was fought and whether the dramatic ground campaign should have exceeded the mere hundred hours it lasted in order to bring about a more decisive conclusion With the seemingly endless follow up to the war continuing *The A to Z of the Persian Gulf War 1990 1991* draws together the results of assessments of the war by a multitude of commentators This is accomplished through an introduction a chronology a list of acronyms and abbreviations a bibliography appendixes and hundreds of cross referenced dictionary entries on many of the significant civilian and military persons crucial diplomatic and political actions as well as the essential military aspects including the strategy and tactics the encounters and battles and the forces and weapons deployed by both sides As the situation in the Middle East continues to deteriorate this reference provides an important historical perspective on an increasingly critical issue *The Oxford Guide to American Military History* John Whiteclay Chambers II., Fred Anderson, G. Kurt Piehler, 1999 *The Russian Way of War* Richard W. Harrison, 2001 In this first comprehensive treatment of the subject Richard Harrison shows how this theory emerged and developed to become despite radically different political settings and levels of technology essential to the Red Army's victory over Germany in World War II **Airpower Journal**, 1999 [The Best Books for Academic Libraries: General works, military & naval, library science](#), 2002 *Unholy Grail* Larry E. Cable, 1991 Based on primary sources many only recently declassified this work examines and explains the failures which caused America to lose the war in Vietnam one of which was a pervasive inability on the part of the military High Command and the administration to act on intelligence reports *An Enduring Framework for Assessing the Contributions of Force Structure to a Coercive Strategy* Eric A. Beene, 2002 The US Department of Defense is still struggling to define itself in the post Cold War age over a decade after the new period has begun With a strategy and force structure review occurring on average every two years the military has still not been able to generate a consistent basis on which to justify its force structure or its strategy This paper uses a decision analysis framework as a foundation for creating such a basis Instead of

depending on leadership for guidance which changes with destabilizing regularity this paper relies on the theories of coercion that began in the Cold War era These theories have particular value today especially in light of the many innovations the nation has undertaken in the past decade Modified and translated for modern conventional warfare these theories form the basis for a framework of enduring requirements for any military force that undertakes a coercive strategy This paper develops this framework to the operational level of analysis and it is applied to two developmental air platforms the Global Hawk Endurance Unmanned Aerial Vehicle and the Unmanned Combat Air Vehicle The unique contributions of these two platforms become apparent using this framework and the value of the framework is depicted as it points to areas for future improvement in these systems Finally the paper makes a comparison between this framework and traditional analyses and strategy review processes and it shows the unique and enduring value of this analytical framework for assessing the contributions of air power platforms

A Framework for Precision Conventional Strike in Post-Cold War Military Strategy J. L. Birkler,1996 What value do PCS weapons have in future military strategies The authors draw two inferences about investment of system development and acquisition dollars 1 Over the near term dollars should be directed toward alleviating the limitations of weather intelligence support and jamming 2 progress on new antitank weapons should be carefully monitored and sufficient numbers should be procured as a matter of high priority
