Fragmentary Class Structure:

Organization Theory and Class Analysis Stewart R. Clegg, 2017-11-07 No detailed description available for Organization Theory and Class Analysis

Capital, Labour and the Middle Classes (RLE Social Theory) John Urry, Nicholas Abercrombie, 2014-08-21 Most recent sociological work on the theory of class is based on a distinction between Weberian and Marxist approaches For the first part of this volume the authors use this distinction to review the literature on the middle class concentrating particularly on the traditions of Marxist theory and of the more empirical work inspired by Max Weber They show however that this distinction is of limited utility in reconstructing a theory of the middle class

Social Inequality and Class Radicalism in France and Britain Duncan Gallie, 1984-01-26 This book first published in 1983 examines in depth the nature and sources of class radicalism in France and Britain and takes issue with some of the major theories of class consciousness and class action Drawing on data both from detailed case studies and from wider national surveys it shows that the conflict of class interests within capitalist societies can lead to sharply diverging attitudes to class inequality It argues that the explanation of such differences cannot be found in some general law of the evolution of social conflict in capitalist society It must be sought in the profound institutional differences that exist between the two societies In particular the study argues for a reassessment of the importance of the experience of war and of the way in which the business and political elite handled the social crises generated by war in accounting for the long term structural divergence of capitalist societies

Leisure, Lifestyle and the New Middle Class Derek Wynne, 2002-01-22 In this valuable study conducted within the theoretical context associated with the work of Pierre Bourdieu Derek Wynne looks at how the new middle class of the late twentieth century goes about constructing and defending its social identity

Class, Politics, and the Decline of Deference in England, 1968-2000 Florence Sutcliffe-Braithwaite, 2018 In late twentieth century England inequality was rocketing yet some have suggested that the politics of class was declining in significance while others argue that class identities lost little power Neither interpretation is satisfactory class remained important to ordinary people s narratives about social change and their own identities throughout the period 1968 2000 but in changing ways Using self narratives drawn from a wide range of sources the raw materials of sociological studies transcripts from oral history projects Mass Observation and autobiography the book examines class identities and narratives of social change between 1968 and 2000 showing that by the end of the period class was often seen as an historical identity related to background and heritage and that many felt strict class boundaries had blurred quite profoundly since 1945 Class snobberies went underground as many people from all backgrounds began to assert that what was important was authenticity individuality and ordinariness In fact Sutcliffe Braithwaite argues that it is more useful to understand the cultural changes of these years through the lens of the decline of deference which transformed people s attitudes towards class and towards politics The study also examines the claim that Thatcher and New Labour wrote class out of politics arguing that this simple and highly political narrative misses

important points Thatcher was driven by political ideology and necessity to try to dismiss the importance of class while the New Labour project was good at listening to voters particularly swing voters in marginal seats and echoing back what they were increasingly saying about the blurring of class lines and the importance of ordinariness But this did not add up to an abandonment of a majoritarian project as New Labour reoriented their political project to emphasize using the state to empower the individual

The Fragmentary Class Structure. [By] K. Roberts, F.G. Cook, [a.o.] Kenneth Roberts, F. G. Cook, 1977

Very Different, But Much the Same W. G. Runciman, 2014-11-13 Very Different but Much the Same takes as its starting point the distribution of political ideological and economic power between English society's constituent roles from the time when Daniel Defoe was writing Robinson Crusoe and argues that Defoe would find it remarkably similar three centuries later despite all the changes in technology lifestyles amenities beliefs attitudes norms and values by which he would no doubt be astonished The disjunction between the two is explained by bringing to bear the approach of current evolutionary sociological theory in which the reproduction or extinction of a society's institutional practices is traced to selective environmental pressures which are independent of the personal motives and subjective experiences of the individuals whose practices they are It is further argued that the rates of high absolute and low relative social mobility that sociologists have documented in detail for the twentieth century are likely to have been much the same during the eighteenth and nineteenth centuries The conclusion drawn is that for as long as the country was not defeated in a European war the probability of a radical change in institutional distribution of power was extremely low throughout however much contemporary observers or later historians would have either welcomed or deplored it

The Social Structure of Medieval East Anglia David Charles Douglas, 1927

British Politics Today Bill Jones, Dennis Kavanagh, 1994 Over the last thirty five years British politics has undergone something of a revolution the collapse of strong class allegiance to parties the recovery of an economy once perceived to be in terminal decline the near twenty year rule of the Tories and the extraordinary emergence and establishment of the Blairite New Labour Party Together with these changes we have also seen the reshaping of the civil service the establishment of devolved assemblies the reform of the Lords the decline of ideology the apparent crushing of the Conservative Party and the ubiquity of media management as a tool of political persuasion This text outlines and contextualizes these major changes and more
