Stakeholder Capitalism Klaus Schwab, 2021-01-06 Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken But we can replace the current picture of global upheaval unsustainability and uncertainty with one of an economy that works for all people and the planet First we must eliminate rising income inequality within societies where productivity and wage growth has slowed Second we must reduce the dampening effect of monopoly

market power wielded by large corporations on innovation and productivity gains And finally the short sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end The debate over the causes of the broken economy laissez faire government poorly managed globalization the rise of technology in favor of the few or yet another reason is wide open Stakeholder Capitalism A Global Economy that Works for Progress People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems our current system will continue to fail us To help us see our challenges more clearly Schwab the Founder and Executive Chairman of the World Economic Forum looks for the real causes of our system's shortcomings and for solutions in best practices from around the world in places as diverse as China Denmark Ethiopia Germany Indonesia New Zealand and Singapore And in doing so Schwab finds emerging examples of new ways of doing things that provide grounds for hope including Individual agency how countries and policies can make a difference against large external forces A clearly defined social contract agreement on shared values and goals allows government business and individuals to produce the most optimal outcomes Planning for future generations short sighted presentism harms our shared future and that of those yet to be born Better measures of economic success move beyond a myopic focus on GDP to more complete human scaled measures of societal flourishing By accurately describing our real situation Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems Chapter by chapter Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and country by country company by company and citizen by citizen glue them back together in a way that benefits us all

The Evolution of Economic Systems Barry Stewart Clark, 2016 The most current text of its kind The Evolution of Economic Systems Varieties of Capitalism in the Global Economy explores the effects of politics and culture on the nature of national economic systems Author Barry Clark distills recent academic work in such areas as comparative political economy varieties of capitalism new and old institutional economics new economic sociology and social systems of production presenting the material in a conversational manner that makes it accessible for undergraduate students

National Culture and the New Global System Frederick Buell, 1994-09 The three worlds theory is perhaps still the basis for our dominant assumptions about geopolitical and geocultural order writes Frederick Buell but its hold on our imagination and faith is passing fast In its place a startlingly different model the notion that the world is somehow interconnected into a single system has emerged expressing the perception that global relationships constitute not three separate worlds but a single network In the wake of disillusionment with anticolonial nationalism and in response to a wide variety of economic political demographic and technological changes Buell argues we have come increasingly to view the world as complexly interconnected In National Culture and the New Global System he considers how the notion of national culture has been conceived and reconceived in the postwar period For much of the period the three world theory provided economic political and cultural models for mapping a world of nation states More recently new notions of interconnectedness have been

developed ones that have had profound and sometimes startling effects on cultural production and theory Surveying recent cultural history and theory Buell shows how our understanding of cultural production relates closely to transformations in models of the world order The Global Economic System Iain Wallace,1992 **The World's Monetary System** Jo Marie Griesgraber,Bernhard G.
