Fragile But Strong:

Relaxation and Diffusion in Complex Systems K.L. Ngai, 2011-03-25 The usefulness of the book to the reader is exposure to many different classes of materials and relaxation phenomena They are tied together by the universal relaxation and diffusion properties they share and a consistent explanation of their origin The readers can apply what they learn to solve their own problems and use it as a stepping stone to make further advances in theoretical understanding of the origin of the universality *Non-equilibrium Phenomena In Supercooled Fluids, Glasses And Amorphous Materials - Proceedings Of The Workshop* Mario P Tosi, Dino Leporini, Marco Giordano, 1996-09-20 This volume contains the Proceedings of the International Workshop on Non Equilibrium Phenomena in Supercooled Fluids Glasses and Amorphous Materials held in Pisa in the early fall of 1995 as a joint initiative of the University of Pisa and of the Scuola Normale Superiore The goal was to bring together liquid state physicists chemists and engineers to review current developments and comparatively discuss experimental facts and theoretical predictions in this vast scientific area The core of the Workshop was a set of general lectures followed by more specific presentations on current issues in the main areas of the field This structure has been maintained in this volume in which a set of five overviews is followed by topically grouped contributions in the five areas of ionic glasses and glassy materials the glass transition viscous flow and microscopic relaxation complex fluids and polymers The volume also preserves a record of the many short contributions given to the Workshop through posters which are grouped in it under the subjects of inorganic glasses organic glasses and complex fluids polymers and theoretical aspects
