Green Politics Stephen Rainbow, 1993 Green politics looks at contemporary green arguments seeing them as direct descendants of a variety of nineteenth century romantic and utopian movements These put value again in non material aspects of social life and offer a critique of current models of development and growth which rely on a narrow conception of economic factors Rainbow acknowledges that this is a very important philosophical base Nonetheless his response and suggestions for the way forward are pragmatic Rainbow's argument is that the State as well as individuals must take a responsibility for a sustainable future In order to attain this political influence green activists need to adopt achievable and credible strategies for change Green politics is a unique resource it analyses green political movements in New Zealand and internationally it analyses and evaluates current and past green philosophies it offers practical suggestions towards gaining a sustainable future Back cover
