Language learning strategies have been a topic of research for roughly three decades Broadly speaking that research has focused on classroom tuition predominantly at secondary level Increasingly however language learning occurs in independent settings whether at distance on Institution Wide Language Programmes IWLPs or in virtual environments

Success in independent language learning is achieved by autonomous individuals with a capacity for self regulation Yet we still know relatively little about the specific means they use to learn effectively whether in terms of the affective strategies they employ to sustain motivation the metacognitive strategies required for planning monitoring and evaluating their learning or the specific cognitive strategies applied to difficult learning tasks These are all discussed and evaluated in *Language Learning Strategies in Independent Settings* Research in Education ,2002 *Engaging the Foreign Language Learner* Angelika Natascha Kraemer,2008 *German Teaching* ,1996 **Forthcoming Books** Rose Army,1997 **The British National Bibliography** Arthur James Wells,1998 **Francophonie** ,1997 **The Indiana Foreign Language Proficiency Guide** Center for School Improvement and Performance (Ind.).
