Teaching And Learning Science Hodson, Derek, 1998-12-01 This book extends and unifies recent debate and research about science education in several disparate fields including philosophy of science cognitive psychology and motivation theory Through an approach based on the personalization of learning and the politicization of the curriculum and classroom it shows how the complex goal of critical scientific literacy can be achieved by all students including those who traditionally underachieve in science or opt out of science education at the earliest opportunity Current thinking in situated cognition and learning through apprenticeship are employed to build a sociocultural learning model based on a vigorous learning community in which the teacher acts as facilitator co learner and anthropologist Later chapters describe how these theoretical arguments can be translated into effective classroom practice through a coherent inquiry oriented pedagogy involving a much more critical and wide ranging use of hands on and language based learning than is usual in science education

Teaching and Learning Science Judith Bennett, 2005-12-07 There is increasingly wide agreement among teachers researchers inspectors advisers and policy makers that both teaching and research will benefit from being brought closer together But how can this be achieved Hard pressed practitioners cannot be expected to review a constant flow of conference papers journals and other publications even if such items were accessibly written This unique book synthesizes relevant research findings for the professional practitioner and highlights their implications for the quality of teaching and learning Whether you are a teacher looking to enhance your practice or a researcher looking for a concise overview of or a researcher looking for a concise overview of the literature this book will be a valuable acquisition

Effective Teaching of Science Wynne Harlen, 1999 This book reviews the literature on effective science teaching examining research from the United Kingdom and other countries The studies included were those that made comparisons between two or more groups differing in science education experiences those that involved upper elementary or lower secondary students those that made comparisons in terms of achievement in science or outcomes related to achievement and those in which innovation was sustainable in normal classrooms The book focuses on eight aspects of science education that might impact students achievement but which have received less attention than other aspects such as gender bias The book features 10 chapters which include the eight topics 1 Introduction 2 The Role of Practical Work 3 Using Computers 4 Approaches to Constructivism 5 Cognitive Acceleration 6 Assessment 7 Planning Questioning and Using Language 8 The Curriculum 9 Teachers Understanding of Science and 10 Discussion Contains approximately 197 references SM
