A Review of Effective Schools
Research as it Relates to Effective Principals Marilyn L. Grady, William W. Wayson, Perry Alan Zirkel, 1989 After briefly introducing the effective schools movement chapter 1 of this monograph describes Ron Edmonds criterion for effective schools poor and minority children should score well on standard achievement tests in proportions equal to those attained by children in the dominant culture and his five basic characteristics a strong improvement minded principal high expectations an orderly environment focus on academic skills and monitoring of student progress Chapter 2 outlines major criticisms of the effective schools movement such as its 1 simplistic formula 2 overblown research claims 3 promises of quick results 4 limited research population 5 focus on narrow educational outcomes 6 promotion of authoritarian techniques and 7 overemphasis on test scores As the next chapter shows the principal principle has been endorsed widely without considering underlying research limitations Overreliance on the strong principal as a solution to school problems ignores more recent research findings and reflects the current top down school organization inhibiting change and improvement Contradictory evidence about the leadership factor demands a reexamination of the term effectiveness Recent research favors a multidimensional definition of the principal s role In the absence of comprehensive assessment tools and longitudinal studies policymakers should be cautious about accepting instructional leadership as a consistent correlate of effective schools Chapter 4 offers four recommendations addressing implications for preparing future administrators Included are 122 references MLH
