Homelessness Cameron Parsell, 2023-09-14 Homelessness is a punishing condition that inflicts unquestionable harm on those who experience it. It is also a social problem that starkly lays bare deep societal failure. As Cameron Parsell shows, society along with the public policy measures intended to address it treats being homeless as an identity casting those who experience homelessness as fundamentally different from us. To be homeless is to face daily victimization, to be a recipient of someone else's care, and to have autonomy taken away. Parsell argues that we have at our disposal the knowledge and momentum to demonstrably reduce and even end homelessness. Our first task is to confront the fact that homelessness is a relatively predictable phenomenon that disproportionately impacts people who are failed by society in myriad ways. We must respond to the problem in ways that understand and thus do not recreate the dehumanizing conditions experienced by those who are homeless. Homelessness is a choice of how we organize society. Sketching the defining features of homelessness, this critical introduction will be a valuable resource for students studying homelessness, housing marginality, and poverty across the social sciences and social work.

Ethics and Accountability in a Context of Governance and New Public Management Annie Hondeghem, European Group of Public Administration, 1998 Ethics and accountability have become important themes for modern government as in most of the countries there is a severe crisis of legitimacy. Increasingly there is a feeling that performance management alone will not solve this crisis. Citizens also expect from politicians and public servants ethical responsible conduct. As to the ethics, however, there is a problem. Governance and new public management have raised new problems which cannot be solved by referring to the traditional bureaucratic ethics. Devolution and decentralisation processes have enhanced the responsibility of public servants. The increase of transparency and openness and the service orientation of public organisations have challenged the traditional values of discretion and equality before the rule. The growing interaction between the public and the private sector have raised the question of integrity. In light of these developments it is important to update the ethical system or reversibly the traditional values of the public service can question some actual evolutions in government.

The Collaborating Planner? Ben Clifford, Mark Tewdwr-Jones, 2014-07-09 Since the turn of the 21st century there has been a greater pace of reform to planning in Britain than at any other time. As a public sector activity, planning has also been impacted heavily by the wider changes in the way we are governed. Yet whilst such reform has been extensively commented upon within academia, few have empirically explored how these changes are manifesting themselves in planning practice. This new book aims to understand how both specific planning and broader public sector reforms have been experienced and understood by chartered town planners working in local authorities across Great Britain. After setting out the reform context, successive chapters then map responses across the profession to the implementation of spatial planning, to targets, to public participation, and to the idea of a customer-focused planning, and to attempts to change the culture of the planning. Each chapter outlines the reaction by the

profession to reforms promoted by successive central and devolved governments over the last decade before considering the broader issues of what this tells us about how modernisation is rolled out by frontline public servants This accessible book fills a gap in the market and makes ideal reading for students and researchers interested in the UK planning system

Angry Abolitionists and the Rhetoric of Slavery Benjamin Lamb-Books,2016-08-03 This book is an original application of rhetoric and moral emotions theory to the sociology of social movements It promotes a new interdisciplinary vision of what social movements are why they exist and how they succeed in attaining momentum over time Deepening the affective dimension of cultural sociology this work draws upon the social psychology of human emotion and interpersonal communication Specifically the book revolves around the topic of anger as a unique moral emotion that can be made to play crucial motivational and generative functions in protest The chapters develop a new theory of the emotional power of protest rhetoric including how abolitionist performances of heterodox racial and gender status imaginaries contributed to the escalation of the sectional conflict over American slavery

Cultural Diversity in the Classroom Julia Athena Spinthourakis,John Lalor,Wolfgang Berg,2011-09-25 The so called nation states have created ethnical minorities Also due to migration cultural diversity is the reality The multicultural society is strongly reproduced in the schools all over Europe Cultural diversity in the classroom is increasingly recognized as a potential which should not be neglected The educational system has above all to provide all children with equal opportunities Experts from Finland the UK Hungary Spain Greece Cyprus and other European states mostly responsible for teacher education have contributed to this volume with critical but constructive remarks on the classroom reality in their countries This book is valuable reading for academics and practitioners in educational sciences
