## **European Community A Guide To The Maze:**

**The European Community**, 1991 *The European Community*, 1995 The European Community Stanley A. Budd, Alun Jones, 1994-01-01 **European Communities** John Paxton, 1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community's target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992 Managing in the Media William Houseley, Tom Nicholls, Ron Southwell, 2013-04-26 Managing in the Media has been devised for a broad audience It is based upon the perceived need for a text that amalgamates cultural theories film and television analysis management theories and media production practice into one volume There are many books on film and cultural studies Similarly there are copious numbers of texts written on management To date little has been written that analyses the management of the audiovisual industry set against the backdrop of the cultural and economic environment within which the media manager operates Managing in the Media is divided into three sections that take the reader from the global to the specific from the strategic to the tactical Each chapter discusses specific topics that can be read in isolation yet contribute to the theme within each part Taken as a whole the book provides the potential professional media manager and current practising media manager with a framework of issues that will give them an awareness of the range of knowledge needed by the successful media manager This book does not try to be a manual to success The media industry is awash with successful individuals none of whom needed textbooks to set them on their chosen career paths Yet these exceptional people prove the rule that in the main most media practitioners would benefit from some additional support and guidance The aim of this book is to present to them some of the management issues that have or will have an

impact upon their working careers The accompanying website [www mediaops net](http://www.mediaops.net) which can also be accessed via [www focalpress com](http://www.focalpress.com) features Tutor notes and reader activities Updated list of further reading Additional support material such as production templates Interviews with the authors A discussion forum Industry and education links Media News
