European Community Merger Control A Practitioners Guide:

European Community Merger Control: A Practitioner's Guide Barry Hawk, 1996-06-06 European Community Merger Control A Practitioner's Guide presents a current and comprehensive one stop review of jurisdictional procedural and substantive issues arising under the European Community's merger control system The treatise written by practitioners for practitioners presents legal economic and comparative analyses of the European system and real world solutions to enable antitrust advisors to guide their clients mergers acquisitions and joint ventures successfully through the Merger Regulation's sometimes turbulent regulatory waters *RETRACTED, The Regulation of Transnational Mergers in International and European Law* Dimitris Liakopoulos, Armando Marsilia, 2009-12-07 The major problem associated with the regulation of transnational mergers which affect several national markets is the allocation of jurisdiction Each country concerned may wish to exert jurisdiction and apply its national competition law to regulate the anti competitive effects a merger may have in its territory However this approach may lead to risks of inconsistent decisions regarding the legality of mergers Indeed the national competition laws applied by the regulating authorities may diverge in several aspects which raise the likelihood of inconsistency Therefore it is desirable to opt for regulatory approaches which are more sensitive to the transnational nature of mergers and which allow cooperation between competition authorities A possible solution may be bilateral cooperation agreements through which two countries coordinate the enforcement activities of their national competition authorities However the benefits of these agreements are enjoyed only by the signatory parties The sole reliance upon bilateral agreements does not appear to be the optimal regulatory approach towards transnational mergers *European Legal Book Index*, 2001 [Regulating Competition in the EU](#) Pernille Wegener Jessen, Bent Ole Gram Mortensen, 2016-04-20 Competition law in the EU includes a wide range of topics and has developed into a very comprehensive area of regulation This book covers the broader perspective of competition law giving an overview of a very complex domain of EU law Through all relevant sources of primary and secondary EU law the book presents the intricacies of the present competition framework for businesses and public entities It draws the lines between the different areas and between competition law and the internal market project The book covers all aspects of traditional EU competition law as well as issues not formally regulated in the TFEU section on competition rules the competition issues of the liberalised sectors and public procurement Among the matters covered are the following the substantive rules on Articles 101 and 102 TFEU the enforcement rules of these provisions merger control the liberalised sectors with focus on energy transport postal services and telecommunication state aid public undertakings and public procurement With its enhanced view of EU competition policy regulation and enforcement and its emphasis on specific industry sectors this book offers an unusually thorough view of aspects of competition law which play an essential role in regulating the conduct of undertakings and public authorities in the market It will be of special value to any lawyer policymaker or scholar active in European competition law [Commercial Law of the European Union](#) Gabriël

Moen, John Trone, 2010-04-23 The Hon Michael Kirby AC CMG This splendid book performs the heroic task of introducing readers to the large canvas of the commercial law of the European Union EU The EU began as an economic community of six nations but has grown into 27 member states sharing a significant political social and legal cohesion and serving almost 500 million citizens It generates approximately 30% of the nominal gross world product The EU is a remarkable achievement of trans national co operation given the history including recent history of national racial ethnic and religious hatred and conflict preceding its creation Although as the book recounts the institutions of the EU grew directly out of those of the European Economic Community created in 1957 the genesis of the EU can be traced to the sufferings of the Second World War and to the disclosure of the barbarous atrocities of the Holocaust Out of the chaos and ruins of historical enmities and the shattered cities and peoples that survived those terrible events arose an astonishing pan European Movement European
