Social Aspects of Language Acquisition - Language Socialization and Grammatical Development Jessica Narloch, 2007-03-19 Seminar paper from the year 2006 in the subject English Language and Literature Studies Linguistics

grade 1 3 University of Duisburg Essen course Language and the Mind language English abstract There are many ways of talking to children and preverbal infants and also a great variety of opinions about how important the child's environment is or if it plays a role at all The question is not only how and why children understand grammatical forms and language Ochs Schieffelin 1995 73 but also which role other aspects such as Parentese and Baby Talk play Are they necessary or totally unimportant Should parents talk to their children at all or is it senseless because they do not understand what the parents say to them Some people are of the opinion that Parentese only plays a minimal role Garnica 1977 63 whereas other people think that the verbal environment is important In how far is the acquisition of language the result of a process of interaction between mother and child Snow 1977 31 By explaining some aspects of talk to children such as Parentese Baby Talk expansion correction imitation and by giving examples of children being socialized through language the question about which role these aspects really play in first language acquisition should be answered

Two First Languages Jürgen M. Meisel, 2010-10-13 Language acquisition is a human endeavor par excellence As children all human beings learn to understand and speak at least one language their mother tongue It is a process that seems to take place without any obvious effort Second language learning particularly among adults causes more difficulty The purpose of this series is to compile a collection of high quality monographs on language acquisition The series serves the needs of everyone who wants to know more about the problem of language acquisition in general and or about language acquisition in specific contexts

First Verbs Michael Tomasello, 1992-03-27 During the second year of his daughter's life Michael Tomasello kept a detailed diary of her language creating a rich database He made a careful study of how she acquired her first verbs and analysed the role that verbs played in her early grammatical development

Marchman, 2021-03-16 A data driven exploration of how children s language learning varies across different languages providing both a theoretical framework and reference The Wordbank Project examines variability and consistency in children s language learning across different languages and cultures drawing on Wordbank an open database with data from more than 75 000 children and twenty nine languages or dialects This big data approach makes the book the most comprehensive cross linguistic analysis to date of early language learning Moreover its data driven picture of which aspects of language learning are consistent across languages suggests constraints on the nature of children s language learning mechanisms The book provides both a theoretical framework for scholars of language learning language and human cognition and a resource for future research

The Development of the Grammatical System in Early Second Language Acquisition Anke Lenzenig,2013-08-14 Shortlisted for the Christopher Brumfit Award in Applied Linguistics The Development of the Grammatical System in Early Second Language Acquisition focuses on the acquisition process of early L2 learners It is based on the following key hypothesis the initial mental grammatical system of L2 learners is constrained semantically syntactically and mnemonically This hypothesis is formalised as the Multiple Constraints Hypothesis The empirical test of the Multiple Constraints Hypothesis is based on a large database including cross sectional and longitudinal data from square one ESL beginners The study demonstrates that the postulated constraints are relaxed successively as learning progresses The book is intended for postgraduate students as well as SLA researchers

Linguistic Theory and Adult Second Language Acquisition Carolina Plaza Pust,2000 General considerations as regards the human language faculty come into play when analysing adult second language acquisition Grammar as conceived in the Principles and Parameters theory is a modularly organised system which relies on both the autonomy and the inter relation of its subcomponents One such inter relation lies at the heart of this study namely the relation between the lexicon and the syntax Following current assumptions it is expected that the acquisition of functional categories plays a crucial role in grammar development However it is a matter of debate whether language acquisition in adulthood relies on the same learning mechanisms as in childhood The critical evaluation of this controversy leads to the conclusion that traditional learning concepts need to be revised in more dynamic terms The dynamic approach proposed is applied in the investigation of the intra individual variation in adult L2 German

Language Learning and Concept Acquisition William Demopoulos,Ausonio Marras,1986 This volume features work on learning by researchers in various disciplines who share an interest in the systematic study of cognition and in the study of the formal and semantic aspects of language acquisition A recurring theme is that language learning involves the acquisition

of certain competencies and the formation of a system of beliefs which are significantly underdetermined by the linguistic and nonlinguistic inputs available to the learner Theories of language learning must confront the epistemological problem of how it is possible to induce and fixate a belief system on the basis of exposure to limited data A typical strategy in dealing with this problem has been to specify various types of formal and empirical constraints on linguistic and conceptual development in terms of specific hypotheses about the character of what is learned and about the kinds of resources and strategies available to the learner Most of the contributions in this volume are concerned with the specification and evaluation of such constraints *The Encyclopedia of Language and Linguistics* R.
