Kandel, David L. Brown, 2006-10-12 CALVIN L BEALE In considering how to introduce the subject of rural population change in st the 21 Century I nd myself re ecting on my own experience as a demographer for the U S Department of Agriculture When I arrived at the Department the post World War II modernization of farming was well under way Each year my colleague Gladys Bowles and I had the unpopular task of announcing how much the farm population had decreased in the prior year It was hard to say that the phenomenon was someone s fault Dramatic reductions in labor requirements per unit of agricultural output were occurring everywhere and not just in the United States But politically blame had to be assigned and whichever political party was not in the White House was certain to place the blame squarely on the current administration The demographic consequences of this trend were major In a 22 year period from 1941 to 1962 the net loss of farm population from migration and cessation of farming averaged over a million people per year It took eight years after the war before an administration was willing to begin to talk about the need to diversify rural employment By that time farm residents had already become a minority of rural people However well into the 1970s I continued to receive inquiries from people who still equated rural with farm or who could not envision what rural nonfarm people did for a living **Rural Aging in 21st Century America** Nina Glasgow, E. Helen Berry, 2012-12-14 This book investigates sociological demographic and geographic aspects of aging in rural and nonmetropolitan areas of the United States Population aging is one of the most important trends of the 20th and 21st centuries and it is occurring worldwide especially in more developed countries such as the United States Population aging is more rapid in rural than urban areas of the U S In 2010 15 percent of the nonmetropolitan compared to 12 percent of the metropolitan population were 65 years of age and older By definition rural communities have smaller sized populations and more limited healthcare transportation and other aging relevant services than do urban areas It is thus especially important to study and understand aging in rural environments Rural Aging in 21st Century America contributes evidence based policy relevant information on rural aging in the U S A primary objective of the book is to improve understanding of what makes the experience of rural aging different from aging in urban areas and to increase understanding of the aged change the nature of rural places The book addresses unique features of rural aging across economic racial ethnic migration and other structures and patterns all with a focus on debunking myths about rural aging and to emphasize opportunities and challenges that rural places and older people experience *Bowker's Law Books and Serials in Print*, 1984 **Pioneer, Patriot, and Nigerian Nationalist** Felix K.
