Van Dyne,1971 *The Ecosystem Concept in Natural Resource Management* George M. Van Dyne,2013 Managing Natural Resources for Development in Africa Washington Odongo Ochola,P. C. Sanginga,Isaac Bekalo,2010 The complex and dynamic interlinks between natural resource management NRM and development have long been recognized by national and international research and development organizations and have generated voluminous literature However much of what is available in the form of university course books practical learning manuals and reference materials in NRM is based on experiences from outside Africa Managing Natural Resources for Development in Africa A Resource Book provides an understanding of the various levels at which NRM issues occur and are being addressed scientifically economically socially and politically The book s nine chapters present state of the art perspectives within a holistic African context The book systematically navigates the tricky landscape of integrated NRM with special reference to Eastern and Southern Africa against the backdrop of prevailing local national regional and global social economic and environmental challenges The authors wide experience the rich references made to emerging challenges and opportunities and the presentation of different tools principles approaches case studies and processes make the book a rich and valuable one stop resource for postgraduate students researchers policymakers and NRM practitioners The book is designed to help the reader grasp in depth NRM perspectives and presents innovative guidance for research design and problem solving including review questions learning activities and recommended further reading The book was developed through a writeshop process by a multi disciplinary team of lecturers from the University of

Nairobi Egerton University Kenyatta University the University of Zimbabwe the University of Malawi Makerere University and the University of Dar es Salam In addition selected NRM experts from regional and international research organizations including the World Agroforestry Center ICRAF the Africa Forest Forum RUFORUM IIRR and the International Development Research Centre IDRC participated in the writeshop and contributed material to the book Integrating Adaptive Management and Ecosystem Services Concepts to Improve Natural Resource Management Rebecca S.

Epanchin-Niell,2018-05 Text of Conclusion section In summary careful and deliberate integration of adaptive management and ecosystem services approaches has the potential to substantially improve management outcomes in a variety of contexts Workshop discussion identified substantial costs and obstacles that need to be addressed to facilitate this integration Indeed fully applying the conceptual approach laid out fig 3 is not practically feasible but the conceptual approach highlights ways for reorienting management to better incorporate both ecosystem service concepts and adaptive decision processes and provides a conceptual foundation for moving the integration forward Jointly pursuing concept development and application would further this integration continued conceptual development of the framework would help to inform application and application in practice is needed to push and refine the framework This report is the first to explore the explicit integration of ecosystem services and adaptive management and it is intended as the start of a long but valuable process of learning and application development Provided by publisher *Adaptive Management of Natural Resources* George H. Stankey,2005 This report reviews the extensive and growing literature on the concept and application of adaptive management Adaptive management is a central element of the Northwest Forest Plan and there is a need for an informed understanding of the key theories concepts and frameworks upon which it is founded Literature from a diverse range of fields including social learning risk and uncertainty and institutional analysis was reviewed particularly as it related to application in an adaptive management context The review identifies opportunities as well as barriers that adaptive management faces It concludes by describing steps that must be taken to implement adaptive management *Ecological Sustainability and Integrity: Concepts and Approaches* J. Lemons,L. Westra,Robert Goodland,2013-04-17 This book follows upon earlier work which culminated in the publication of two recent books Sustainable Development Science Ethics and Public Policy John Lemons and Donald A Brown editors and Perspectives on Ecological Integrity Laura Westra and John Lemons editors Both of these books also were published by Kluwer Academic Publishers In this book we seek to explore more fully the concepts of sustainability and ecological integrity as well as the connections between them We have divided chapters into three groups In the first the concept of sustainability in relation to science law and ethics is explored In the second concepts of sustainability and ecological integrity are applied to problems in specific natural resources Finally in the third group we examine possible approaches to public policy which might include concepts of sustainability and ecological integrity Overall we believe that this collection presents a wide variety of perspectives discussions and case studies John Lemons Laura Westra Robert

Guntenspergen,2014-02-07 Natural resource managers face a complex decision making environment characterized by the potential occurrence of rapid and abrupt ecological change These abrupt changes are poorly accommodated by traditional natural resource planning and decision making processes As recognition of threshold processes has increased contemporary models of ecological systems have been modified to better represent a broader range of ecological system dynamics Key conceptual advances associated with the ideas of non linear responses the existence of multiple ecological stable states and critical thresholds are more likely the rule than the exception in ecological systems Once an ecological threshold is crossed the ecosystem in question is not likely to return to its previous state There are many examples and a general consensus that climatic disruptions will drive now stable systems across ecological thresholds This book provides professional resource managers with a broad general decision framework that illustrates the utility of including ecological threshold concepts in natural resource management It gives an entry into the literature in this rapidly evolving concept with descriptions and discussion of the promising statistical approaches for threshold detection and demonstrations of the utility of the threshold framework via a series of case studies

Ecosystem Management Mark S. Boyce,Alan W. Haney,1997-01-01 Until recently natural resource management of such commodities as timber and wildlife was driven largely by the desire to exploit these resources During the past three decades however ecologists have warned that this approach to natural resource management could have unforeseen consequences because it ignored how ecosystems function within the landscape Federal agencies that oversee forest and wildlife resources have begun to implement different schemes of ecosystem management schemes that vary enormously among agencies Contributors to this volume leading experts who are agency personnel as well as researchers now clarify the key elements of sound ecosystem management and offer prescriptions for implementing them The authors discuss definitions of ecosystem management sustainability of ecological systems landscape ecology resource management at different scales and in an ecosystem context new advances in computer technology that facilitate classification schemes for ecosystems ecosystem restoration biological diversity and public concerns Throughout the experts agree that management practices must be sustainable that production of commodities such amenities as recreation and aesthetics and biodiversity must not be allowed to decline over time *Ecosystem Management Strategies for the Lake Superior Region* ,1994 **Natural Resource Management Issues in Human-Influenced Landscapes** Hemachandra, Dilini,Dissanayaka, Samantha,2024-08-22

Researchers working on natural resource management issues in human influenced landscapes need to be able to elicit both biophysical and socio economic information and explore the interactions between these realms to identify appropriate management options Biophysical scientists are increasingly interested in researching natural resource management This however requires a sensitivity to the socio ecological dimensions in a landscape and at least a basic understanding of how to incorporate such in the research designing phase Natural Resource Management Issues in Human Influenced Landscapes documents the firsthand research designing experience of prolific researchers for the knowledge of budding researchers which is not usually shared in journal publications The chapters showcase cases narrated by the authors about their field experiences and cross country comparisons Covering topics such as biodiversity plant genetic resources and sustainable production this premier reference source is an essential resource for ecologists government officials students and educators of higher education librarians researchers and academicians

As befits the topic this beautifully packaged wonderfully illustrated interdisciplinary resource has more than 1200 entries written by specialists A helpful reader s guide groups topics like agriculture conservation and ecology movements and regulations politics pollution and society A resource guide chronology glossary and list of the UN s economic indicators complete the set Library Journal this important work gives a well focused snapshot of environmentalism in the early 21st Century and it will remain valuable into the future both for its content and as a yardstick to measure progress toward sustainability and conservation Summing Up Recommended Undergraduates and general readers CHOICE Booklist Editors Choice 2008 This superb interdisciplinary work should find a place on the shelves of every public and academic library that has the least bit of interest in environment issues which should mean just about all Booklist Starred Review Where does the environment leave off and society begin When expanding production and consumption drives greenhouse gas emissions that warm the planet which in turn influence the conditions of economic expansion it is unclear where the climate ends and the economy begins This fact is not new to our era however our social and natural sciences have only recently come to grips with the incredible complexity of the world described by understanding the environment and society as being of a piece As a result in the last decade there has been an unprecedented explosion of new concepts theories facts and techniques that follow from such an understanding The Encyclopedia of Environment and Society brings together multiplying issues concepts theories examples problems and policies with the goal of clearly explicating an emerging way of thinking about people and nature With more than 1 200 entries written by experts from incredibly diverse fields this innovative resource is a first step toward diving into the deep pool of emerging knowledge The five volumes of this Encyclopedia represent more than a catalogue of terms Rather they capture the spirit of the moment a fascinating time when global warming and genetic engineering represent only two of the most obvious examples of socio environmental issues Key Features Examines many new ideas about how the world works

what creates the daunting problems of our time and how such issues might be addressed whether by regulation markets or new ethics Demonstrates how theories of environmental management based on market efficiency may not be easily reconciled with those that focus on population and both may certainly diverge from those centering on ethics justice or labor Offers contributions from experts in their fields of specialty including geographers political scientists chemists anthropologists medical practitioners development experts and sociologists among many others Explores the emerging socio environmental problems that we face in the next century as well as the shifting and expanding theoretical tools available for tackling these problems Covers regions of North America in greater detail but also provides a comprehensive picture that approaches as effectively as possible a cohesive global vision Key Themes Agriculture Animals Biology and Chemistry Climate Conservation and Ecology Countries Geography History Movements and Regulations Organizations People Politics Pollution Society Packed with essential and up to date information on the state of the global socio environment the Encyclopedia of Environment and Society is a time capsule of its historic moment and a record of where we stand at the start of the 21st century making it a must have resource for any library These inspiring volumes provide an opportunity for more new ways of thinking behaving and living in a more than human world Public Policymaking and Environmental Quality Nedjelko D. Suljak,1971 *Urban Ecology* John Marzluff, Eric Shulenberg, Wilfried Endlicher, Marina Alberti, Gordon Bradley, Clare Ryan, Craig ZumBrunnen, Ute Simon, 2008-01-03 Urban Ecology is a rapidly growing field of academic and practical significance Urban ecologists have published several conference proceedings and regularly contribute to the ecological architectural planning and geography literature However important papers in the field that set the foundation for the discipline and illustrate modern approaches from a variety of perspectives and regions of the world have not been collected in a single accessible book Foundations of Urban Ecology does this by reprinting important European and American publications filling gaps in the published literature with a few targeted original works and translating key works originally published in German This edited volume will provide students and professionals with a rich background in all facets of urban ecology The editors emphasize the drivers patterns processes and effects of human settlement The papers they synthesize provide readers with a broad understanding of the local and global aspects of settlement through traditional natural and social science lenses This interdisciplinary vision gives the reader a comprehensive view of the urban ecosystem by introducing drivers patterns processes and effects of human settlements and the relationships between humans and other animals plants ecosystem processes and abiotic conditions The reader learns how human institutions health and preferences influence and are influenced by the others members of their shared urban ecosystem **Environmental Management** Nedjelko D.
