Interactive Approaches to Water Governance in Asia Kenji Otsuka,2019-01-12 This book applies interactive perspectives which have historically mainly been discussed in the context of Western European countries to case studies on water governance in Asia It examines how these perspectives can be used to reveal complex and dynamic interactions in water governance in Asia and how interactions between policies and practices as well as those between formal institutes and emerging informal institutes come to pass In two introductory chapters and seven case studies in Asia two from China and each one from Japan Thailand the Philippines Indonesia and India the book reveals the interactive forms currently emerging in Asia under hierarchical but often fragmented administrative systems In addition it explores emerging hybrid forms of interactive governance which bring together governmental and non governmental actors and discusses how the expected role of government and roles of non governmental actors could be changed to solve problems in a more cooperative manner In this context researchers from outside the locality could play an important role helping facilitate such forms of interactive governance The book offers extensive information on the essential features of interactive forms and on the role of such transdisciplinary approaches making it a valuable resource not only for scholars and university students but also for policymakers and grass roots practitioners directly involved in the interactive process of water governance
