The Story of Life in 25 Fossils Donald R. Prothero, 2015-08-25 Every fossil tells a story Best selling paleontology author Donald R Prothero describes twenty five famous beautifully preserved fossils in a gripping scientific history of life on Earth Recounting the adventures behind the discovery of these objects and fully interpreting their significance within the larger fossil record Prothero creates a riveting history of life on our planet The twenty five fossils portrayed in this book catch animals in their evolutionary splendor as they transition from one kind of organism to another We witness extinct plants and animals of microscopic and immense size and thrilling diversity We learn about fantastic land and sea creatures that have no match in nature today Along the way we encounter such fascinating fossils as the earliest trilobite Olenellus the giant shark Carcharocles the fishibian Tiktaalik the Frogamander and the Turtle on the Half Shell enormous marine reptiles and the biggest dinosaurs known the first bird Archaeopteryx the walking whale Ambulocetus the gigantic hornless rhinoceros Paraceratherium the largest land mammal that ever lived and the Australopithecus nicknamed Lucy the oldest human skeleton We meet the scientists and adventurers

who pioneered paleontology and learn about the larger intellectual and social contexts in which their discoveries were made Finally we find out where to see these splendid fossils in the world s great museums Ideal for all who love prehistoric landscapes and delight in the history of science this book makes a treasured addition to any bookshelf stoking curiosity in the evolution of life on Earth

Evolution Donald R. Prothero,2007-11-06 Over the past twenty years paleontologists have made tremendous fossil discoveries including fossils that mark the growth of whales manatees and seals from land mammals and the origins of elephants horses and rhinos Today there exists an amazing diversity of fossil humans suggesting we walked upright long before we acquired large brains and new evidence from molecules that enable scientists to decipher the tree of life as never before The fossil record is now one of the strongest lines of evidence for evolution In this engaging and richly illustrated book Donald R Prothero weaves an entertaining though intellectually rigorous history out of the transitional forms and series that dot the fossil record Beginning with a brief discussion of the nature of science and the monkey business of creationism Prothero tackles subjects ranging from flood geology and rock dating to neo Darwinism and macroevolution He covers the ingredients of the primordial soup the effects of communal living invertebrate transitions the development of the backbone the reign of the dinosaurs the mammalian explosion and the leap from chimpanzee to human Prothero pays particular attention to the recent discovery of missing links that complete the fossil timeline and details the debate between biologists over the mechanisms driving the evolutionary process Evolution is an absorbing combination of firsthand observation scientific discovery and trenchant analysis With the teaching of evolution still an issue there couldn t be a better moment for a book clarifying the nature and value of fossil evidence Widely recognized as a leading expert in his field Prothero demonstrates that the transformation of life on this planet is far more awe inspiring than the narrow view of extremists

Dynamic Paleontology Mark A.S. McMenamin,2016-06-10 Using a series of case studies the book demonstrates the power of dynamic analysis as applied to the fossil record Written in an engaging and informative style Dynamic Paleontology outlines the best application of quantitative and other tools to critical problems in the paleontological sciences including such topics as analysis of the Cambrian Explosion and the question regarding the presence of life on Mars The book considers how we think about certain types questions and shows how we can refine our approach to analysis right from the beginning of any particular research effort The analytical tools presented here will have wide application to other fields of knowledge as such the book represents a major contribution to our deployment of modern scientific method

Earth's Evolving Systems Martin,2016-12-16 Earth s Evolving Systems The History of Planet Earth Second Edition is an introductory text designed for popular courses in undergraduate Earth history Written from a systems perspective it provides coverage of the lithosphere hydrosphere atmosphere and biosphere and discussion of how those systems interacted over the course of geologic time

Major Events in the History of Life J. William Schopf,1992 Major Events in the History of Life present six chapters that summarize our understanding of crucial events that shaped the development of the earth s

environment and the course of biological evolution over some four billion years of geological time The subjects are covered by acknowledged leaders in their fields span an enormous sweep of biologic history from the formation of planet Earth and the origin of living systems to our earliest records of human activity Several chapters present new data and new syntheses or summarized results of new types of analysis material not usually available in current college textbooks

American Paleontologist, 1998
