Environment In World Politics:

The Global Environment and World Politics Elizabeth R. DeSombre, 2002 Politically the world is composed of states Environmentally the world is made up of ecosystems This disconnection between ecological and political systems makes addressing environmental issues at the global level both more difficult and more necessary This volume examines how we should set about addressing the problems that face the environment internationally The field of international environmental politics draws on a variety of academic traditions It uses international relations theory to look at the concerns and actions of states but it also uses variety of new perspectives to explain issues that are unique to the study of the environment Elizabeth DeSombre explores four important approaches to the field international environmental cooperation the relationship between the environment and security the issues of science uncertainty and risk and the role of non state actors She explores these approaches with the help of case studies on specific problems facing the global environment focusing in particular on ozone depletion and global climate change the politics of whaling the protection of Amazonian biodiversity and acid rain in Europe and North America

The Global Politics of the Environment Lorraine Elliott, 2004-08 Human activity is changing the global environment on a scale unlike that of any other era Environmental deterioration is now a global issue ecologically politically and economically that requires global solutions Yet there is considerable disagreement over what kinds of strategies we should adopt in order to halt and reverse damage to the global ecosystem What kinds of international institutions are best suited to dealing with global environmental problems Why are women and indigenous peoples still marginalized in global environmental politics What are the consequences of the global ecological crisis for economic and security policies The Global Politics of the Environment makes sense of the often seemingly irreconcilable answers to these questions It focuses throughout on the tensions between mainstream strategies which seek to build support for reforms through existing institutions and radical critiques which argue that environmental

degradation is a symptom of a dysfunctional world order that must itself be transformed if we are to meet the challenge of saving the planet

The Global Politics of the Environment Lorraine M. Elliott, 1998 What kinds of international institutions are best suited to dealing with global environmental problems How can we address the crisis of state capacity What role should non state actors have in environmental governance Why are women and indigenous peoples still marginalized in global environmental politics What are the consequences of the global ecological crisis for economic and security policies The Global Politics of the Environment makes sense of the often seemingly irreconcilable ideas behind answers to these questions It focuses throughout on the tensions between mainstream strategies which seek to build support for reforms through existing institutions and radical critiques which argue that environmental degradation is a symptom of a dysfunctional world order that must itself be transformed if we are to meet the challenge of saving the planet

The Environment and International Relations Kate O'Neill, 2009-01-22 This textbook enables students to apply the theory and approach of International Relations to environmental challenges facing a complex international political system

Global Environmental Politics Hayley Stevenson, 2017-11-02 Concern about humanity's impact on the planet has never been greater but what are the drivers of environmental change This wide ranging introductory textbook outlines the competing explanations of why environmental problems occur and examines the different political approaches taken to address them Adopting a case study approach Hayley Stevenson enables students to gain a detailed understanding of how theories and concepts are applied in practice Diverse perspectives on a variety of contemporary environmental challenges from climate change to hazardous waste as well as various responses from multilateral diplomacy to consumer focused campaigns provide students with an in depth understanding of the merits and limitations of different forms of political action Refined on the basis of classroom feedback features include textboxes key points a glossary of key terms questions further reading suggestions and supplementary online resources This lively book is an essential resource for advanced undergraduate and postgraduate courses on global environmental politics and environmental policy

Environmental NGOs in World Politics Matthias Finger, Thomas Princen, 2013-01-11 At a time when states are reactive at best to the global ecological crisis and when economic globalization seems to be significantly contributing to the acceleration of that crisis environmental non governmental organisations NGOs are proliferating This book explains the key role of NGOs in an emerging world environmental politics showing how NGOs act both as independent bargainers and as agents of social learning to link biophysical conditions to the political realm at both the local and global levels Through the use of case studies the authors reveal the richness and diversity of NGO activity and the difficulty of the choices facing decision makers in their attempts to protect the environment seek new forms of governance and foster social environmental learning The book generates questions that are central not only to an understanding of NGO relations but to the study of international environmental politics Environmental NGOs in World Politics will be of great interest to upper level student and scholars of both

environmental politics and international relations It will also appeal to environmental policy professionals The Environment and International Relations Mark Imber, John Vogler, 2005-08-12 Environmental issues and questions of global change are now firmly established on the international political agenda This book provides a wide ranging survey of the current treatment of environmental issues in international relations This book begins by looking at the relevance of the different theoretical approaches current in international relations to the study of the environment It analyzes a wide range of approaches from the debate between neo realism and liberal institutionalism to the significant connections between gender and global environmental change The book goes on to consider a range of key international processes discussing the monitoring and implementation of environmental agreements the place of ideology in negotiations and the role of international organisations Understanding Global Environmental Politics M. Paterson, 2000-04-07 Understanding Global Environmental Politics develops a new critical approach to global environmental politics It argues that the major power structures of world politics are deeply problematic in ecological terms and that they cannot be easily used to resolve major environmental challenges such as global warming Instead of simply advocating the construction of new international institutions to respond to such challenges therefore the book argues that the construction of alternative social and political structures is necessary **Global Environmental Politics** Pamela S. Chasek, David Leonard Downie, Janet Welsh Brown, 2014 Although discussions about the global environment are now a daily occurrence from companies touting energy saving products to politicians debating how to best address the issue of climate change and other environmental concerns it remains a topic plagued by misinformation and ideologically skewed arguments For more than twenty years Global Environmental Politics has provided an up to date accurate and unbiased introduction to the world's most pressing environmental issues and this new edition continues the tradition With new material on the latest international environmental regimes the 2012 UN Conference on Sustainable Development the challenges of regime implementation and the impact of the global economic crises on the global environment the authors offer a comprehensive overview of the environment and international politics It is vital reading for anyone wishing to understand the current state of the field and to make informed decisions about which policies might best safeguard our environment for the future **Global Environmental Politics** Pamela S. Chasek, David L. Downie, Janet Welsh Brown, 2006-01-03 Rev ed of Global environmental politics Gareth Porter Janet Welsh Brown and Pamela S Chasek 3rd ed 2000 The Environment and International Politics Hakan Seckinelgin, 2005-11-17 This new study shows how environmental issues represent a deep problem in conceptualising the relationship between human beings and nature This key relationship grounds the implicit ethical and political concerns of International Relations and our understandings of environmental politics It demonstrates that the core theoretical orientations of the study of International Relations are not only incapable of understanding and responding to contemporary problems but are profoundly complicit in creating the ecological problems in the first place This major book develops a sense

of these realities based on the thinking of Martin Heidegger It forwards new ways of rethinking the environmental questions and addresses crucial issues such as sovereignty the International Law of The Sea the Kyoto Protocol Northern Alaskan oil exploration and exploitation and the impact of the United Nations Convention on the Law of The Sea III This is essential specialist reading for readers concerned with the environment **Global Environmental Politics** Gabriela

Kutting,2010-09-13 Global Environmental Politics is the perfect introduction to this increasingly significant area The text combines an accessible introduction to the most important environmental theories and concepts with a series of detailed case studies of the most pressing environmental problems Features and benefits of the book Explains the most important concepts and theories in environmental politics Introduces environmental politics within the context of political science and international relations theories Demonstrates how the concepts and theories apply in a wide variety of real world contexts Case studies include the most important environmental issues from climate change and biodiversity to forests and marine pollution Each chapter is written by an established international authority in the field This exciting new textbook is essential reading all students of environmental politics and will be of great interest to students of International Relations and Political Economy **Traditions and Trends in Global Environmental Politics** Olaf Corry, Hayley Stevenson,2017-07-20

How can a divided world share a single planet As the environment rises ever higher on the global agenda the discipline of International Relations IR is engaging in more varied and transformative ways than ever before to overcome environmental challenges Focusing in particular on the key trends of the past 20 years this volume explores the main developments in the global environmental crisis with each chapter considering an environmental issue and an approach within IR In the process adjacent fields including energy politics science and technology and political economy are also touched on Traditions and Trends in Global Environmental Politics is aimed at anybody interested in the key international environmental problems of the day and those seeking clarification and inspiration in terms of approaches and theories that decode how the environment is accounted for in global politics It will be an essential resource for students and scholars of global environmental politics and governance environmental studies and IR *Handbook of Global Environmental Politics* Peter Dauvergne,2005 The book s greatest strength is the range and theoretical ambition of its contributions to regime theory governance and international cooperation Recommended Graduate students researchers and faculty D L Feldman Choice The first Handbook of original articles by leading scholars of global environmental politics this landmark volume maps the latest theoretical and empirical research in this young and growing field Captured here are the dynamic and energetic debates over concerns for the health of the planet and how they might best be addressed The introductory chapters explore the intellectual trends and evolving parameters in the field of global environmental politics They make a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change The remaining chapters are divided into three broad themes states governance and security capitalism trade and corporations

and knowledge civil societies and ethics with each section providing a cohesive discussion of current issues In depth explorations are given to topics such as global commons renewable energy the effectiveness of environmental cooperation regulations and corporate standards trade liberalization and global environmental governance and science and environmental citizenship A comprehensive survey of the latest research the Handbook is a necessary reference for scholars students and policymakers in the field of global environmental politics

The Greening of Sovereignty in World Politics Karen Litfin,1998 This is the first book to connect two important subfields in international relations global environmental politics and the study of sovereignty the state s exclusive authority within its territorial boundaries The authors argue that the relationship between environmental practices and sovereignty is by no means straightforward and in fact elucidates some of the core issues and challenges in world politics today Although a number of international relations scholars have assumed that transnational environmental organizations and institutions are eroding sovereignty this book makes the case that ecological integrity and state sovereignty are not necessarily in opposition It shows that the norms of sovereignty are now shifting in the face of attempts to cope with ecological destruction but that this greening of sovereignty is an uneven variegated and highly contested process By establishing that sovereignty is a socially constructed institution that varies according to time and place with multiple meanings and changing practices *The Greening of Sovereignty in World Politics* illuminates the complexity of the relationship between sovereignty and environmental matters and casts both in a new light Contributors Daniel Deudney Margaret Scully Granzeier Joseph Henri Jupille Sheldon Kamieniecki Thom Kuehls Ronnie D Lipschutz Karen T Litfin Marian A L Miller Ronald B Mitchell Paul Wapner Veronica Ward Franke Wilmer

Climate Change in World Politics J. Vogler,2016-02-02 John Vogler examines the international politics of climate change with a focus on the United Nations Framework Convention UNFCCC He considers how the international system treats the problem of climate change analysing the ways in which this has been defined by the international community and the interests and alignments of state governments *Advances in International Environmental Politics* M. Betsill,K. Hochstetler,D. Stevis,2014-07-16 This book provides authoritative and up to date research for anyone interested in the study of international environmental politics It demonstrates how the field of international environmental politics has evolved and identifies key questions topics and approaches to guide future research

The State and Social Power in Global Environmental Politics Ronnie D. Lipschutz,Ken Conca,1993 *The State and Social Power in Global Environmental Politics* examines how the difficult issues of social political and economic relations will complicate the efforts initiated at the June 1992 Earth Summit in Rio de Janeiro The contributors argue that national governments must begin to acknowledge the role of new actors in their environmental policies The authors of these original essays including Jesse C Ribot James N Rosenau Barbara Jancar and Ann Hawkins envision a world in which governments driven by various pressures find themselves increasingly bound to common efforts and joint solutions

The Third World in Global Environmental Politics Marian A. L. Miller,1995 Both the North

and the South have significant stakes in the global environment but they bring differing interests and agendas to the bargaining table. An inequitable global economic system and the internationalization of economies have reduced Third World countries' control over the disposition of their resources and affected their strategies in global environmental negotiations. Focusing on these issues, Miller traces the efforts of developing countries to influence evolving environmental regimes. Negotiations regarding hazardous waste trade, biodiversity, technology transfer, and atmosphere and climate serve as case studies.
