American Environmental Policy, updated and expanded edition Christopher Mcgrory Klyza, David J. Sousa, 2013-08-30 An updated investigation of alternate pathways for American environmental policymaking made necessary by legislative gridlock The golden era of American environmental lawmaking in the 1960s and 1970s saw twenty two pieces of major environmental legislation including the Clean Air Act the

Clean Water Act and the Endangered Species Act passed by bipartisan majorities in Congress and signed into law by presidents of both parties. But since then partisanship, the dramatic movement of Republicans to the right and political brinksmanship have led to legislative gridlock on environmental issues. In this book Christopher Klyza and David Sousa argue that the longstanding legislative stalemate at the national level has forced environmental policymaking onto other pathways. Klyza and Sousa identify and analyze five alternative policy paths which they illustrate with case studies from 1990 to the present: appropriations politics in Congress, executive authority, the role of the courts, next generation collaborative experiments and policymaking at the state and local levels. This updated edition features a new chapter discussing environmental policy developments from 2006 to 2012, including intensifying partisanship on the environment, the failure of Congress to pass climate legislation, the ramifications of *Massachusetts v. EPA* and other Obama administration executive actions, some of which have reversed Bush administration executive actions. Yet they argue despite legislative gridlock, the legacy of 1960s and 1970s policies has created an enduring green state rooted in statutes, bureaucratic routines and public expectations.

Environmental Politics Norman Miller, 2001-08-31. At every stage environmental policy is the result of the combat of stakeholders interested in and affected by the problem being addressed and the range of possible solutions. The combatants include any or all of the following: the federal government, environmental advocacy groups and business, the media, the scientific community, think tanks, NGOs, of every stripe, trade associations and professional organizations, and even state and local governments, each of whom have their own interests in the resulting policy.

Environmental Politics: Interest Groups, the Media and the Making of Policy discusses political battles over the environment from ground level as they are fought in legislative chambers, the daily newspaper, on television and increasingly on the Internet. The text explores environmental politics as a clash of interests, not ideologies, and environmental policy as a result of the reconciliation of those interests. The author covers not only the conventional aspects of the policymaking process but more recent and less recognized elements and developments such as Proliferation of legislative riders and monument designations as major environmental strategies, Evolving role of the media from science popularizer to agenda setter, Growing influence on both Congress and the public of conservative and libertarian foundations and think tanks, Devolution of environmental power from the Federal to state governments, Metamorphosis of EPA in a business driven regulatory revolution, Effect of globalization on US environmental policy, Newly emerging role of the precautionary principle in marrying science and politics, Increasing role of the Internet in promoting populist issues and promoting the decentralization of the environmental power structure. No other book covers the politics of the environment the way this one does. Written by an expert with 25 years of experience in environmental policymaking, **Environmental Politics: Interest Groups, the Media and the Making of Policy** gives you an insider's view of how policies are forged. By examining these issues through an interest group lens, this book not only accounts for what policies have been adopted but also shows how you can influence policy and effect change.

Congress and Economic Policy Making Darrell M. West, 2010-11-23 Economic policymaking has perpetually been one of the central dilemmas facing Congress leading to huge budget deficits and disagreements among legislators about spending priorities and tax policies This book examines congressional decision making on economic policy during the Reagan administration It looks at legislative actions on Reaganomics tax reform and the politics of deficit reduction and shows the importance of looking not just at the consequences of these decisions but also at the legislative processes that led to them Using an activist based approach and previously unexamined data Darrell West shows that district activists often more conservative than the public at large exerted a disproportionate and misleading effect on congressional voting When this support eventually proved unstable a more skeptical Congress began to eventually back away from the president s policies This move had serious consequences for deficit reduction and policy initiation and also influenced the final shape of the tax reform package adopted in 1986
