Environmental Valuation New Perspectives:

Environmental Valuation Kenneth George Willis, John T. Corkindale, 1995 This volume consists of papers covering six key topics cost benefit analysis the approaches of economists and ecologists the pros and cons of alternative valuation methods contingent valuation environmental benefit estimates and the establishment of research priorities *Environmental Valuation* Kenneth G. Willis, Peter Nijkamp, Kenneth Button, 1999

The Economic Value of the Environment Magnus Hardarson, Pall Hardarson, 2001

Handbook of Environmental Economics Karl-Göran Mäler, Jeffrey R. Vincent, 2003 The Handbook of Environmental Economics focuses on the economics of environmental externalities and environmental public goods Volume I examines environmental degradation and policy responses from a microeconomic institutional standpoint Its perspective is dynamic including a consideration of the dynamics of natural systems and global with attention paid to issues in both rich and poor nations In addition to chapters on well established topics such as the theory and practice of pollution regulation it includes chapters on new areas of environmental economics research related to common property management regimes population and poverty mechanism design political economy of regulation experimental evaluations of policy instruments and technological change

Handbook of Environmental Economics Karl-Goran Maler, Jeffrey R. Vincent, 2005-12-09 Much applied environmental economics is concerned with the valuation of changes in environmental quality Obtaining reliable valuation estimates requires attention to theoretical and econometric issues that are often quite subtle Volume 2 of the Handbook of Environmental Economics presents both the theory and the practice of environmental valuation It synthesizes the vast literature that has accumulated since the publication of the Handbook of Natural Resource and Energy Economics two decades ago It includes chapters on individual valuation methods written by researchers responsible for fundamental advances in those methods It also includes cross cutting chapters that deal with aspects of welfare theory uncertainty experimental methods and public health that are pertinent to valuation Throughout the volume attention is paid to research and policy issues that arise not only in high income countries where most of the theory and econometrics that underlie applied valuation methods have been developed but also in poorer parts of the world The volume provides a state of the art reference for scholars and practitioners alike

Integrated Evaluation for Sustainable River Basin Governance Nuno Videira, Giorgos Kallis, Paula Antunes, Rui Santos, Peter A. Vanrolleghem, John B. Copp, 2007-01-01 This Report synthesizes the main results obtained throughout the ADVISOR research project Integrated Evaluation for Sustainable River Basin Governance funded by the European Commission under the Energy Environment and Sustainable Development theme of the 5th Framework Research Programme The aim of ADVISOR was to improve the understanding of evaluation processes as part of river basin planning and management and to provide a framework supported by a toolkit for the conduct of integrated and participatory evaluations The project comprised four work packages Work Package 1 examined past water project or plan evaluation cases in five EU states and drew insights on the problems of past evaluation practices

Work Package 2 interpreted these past experiences from different analytical angles leading to a theory for an integrated evaluation process emphasising issues of deliberation multiple values quality in the use of information and governance Work Package 3 moved from theory to practice Different tools which could contribute to integrated evaluation processes were tested in experimental case applications These included scenario workshops mediated modelling supported by a quality assurance protocol social multi criteria evaluation cost effectiveness analyses and monetary valuation Work Package 4 aimed at transferring the experience and lessons learned during the ADVISOR project to policy makers contributing especially to the implementation process of the Water Framework Directive A guidance document for designing and implementing Integrated Deliberative Decision Processes IDDP was developed detailing a step by step procedure to achieve integrated evaluations The synthesis of the main results achieved throughout the ADVISOR project is presented in this report in three parts Part A sets the stage for the role of integrated evaluations in river basin planning and management Part B unfolds the set of relevant principles and tools developed in the project and Part C concludes with futures challenges for integrated evaluation processes
