Environment And The Developing World:

Environment and the Developing World Avijit Gupta, Mukul G. Asher, 1998-08-04 Environment and the Developing World brings together the various aspects of environmental studies and management earth and natural sciences engineering and economics as they relate to the developing world It discusses environmental issues as well as the techniques and infrastructure for their management at various levels global national and local The examples range from global warming and ozone depletion to the management of water resources and indoor air pollution The book stresses the interrelated and interdisciplinary nature of environment discusses the concept of sustainable development explores the role of non governmental organisations and evaluates the importance attributed by international and multilateral organisations to monitoring environmental aspects of development projects It critically reviews various economic social and regulatory policies which address environmental issues The different disciplines of the two authors a physical geographer and a public policy economist help to maintain the balanced and interdisciplinary nature of the book Written primarily for advanced undergraduates this is a stimulating text for any environment related course Written in simple language and avoiding unnecessary jargon the book explains clearly the technical aspects of environmental management Profuse illustrations a large number of examples from a range of geographical areas boxed case studies and stimulating exercises make the book attractive and comprehensive All these features make the book a unique teaching tool in environmental management in the developing world

Green Development William Mark Adams, 2001 This revised and updated new edition retains the clear and powerful argument which characterized the original It gives a valuable analysis of the theory and practice of sustainable development and suggests that at the start of the new millennium we should think radically about the challenge of sustainability Fully revised this latest edition includes further reading chapter outlines chapter summaries and new discussion topics and explores the roots of sustainable development thinking and its evolution in the last three decades of the twentieth century the dominant ideas within mainstream sustainable development the nature and diversity of alternative ideas about sustainability the problems of environmental degradation and the environmental impacts of development strategies for building sustainability in development from above and below Offering a synthesis of theoretical ideas on sustainability based on the industrialized economies of the North and the practical applied ideas in the South which tend to ignore First World theory this important text gives a clear discussion of theory and extensive practical insights drawn from Africa Latin America and Asia

Evaluating Environment in International Development Juha I. Uitto, 2014-04-24 More than twenty years after the Earth Summit was held in Rio de Janeiro in 1992 both national and international actors in governmental and nongovernmental fields are still searching for insights into how sustainable development can be advanced and environmental concerns incorporated into the development agenda more effectively Moreover climate change has emerged as a preminent challenge to both the environment and to development Evaluating Environment in International

Development provides international perspectives and in depth knowledge of evaluating development and the environment and applies evaluation knowledge to climate change mitigation and adaptation The book focuses on the approaches and experiences of leading international organizations not for profits and multilateral and bilateral aid agencies to illustrate how systematic evaluation is an essential tool for providing evidence for decision makers It provides novel and in depth perspectives on evaluating environment and sustainability issues in developing countries Moving beyond projects and programmes it considers aspects such as evaluating normative work on the environment and evaluating environmental consequences of economic and social development efforts This original collection should be of interest to scholars of environment studies development studies international relations sustainable development and evaluation as well as practitioners in international organizations and development and environmental NGOs *The Environmental Divide* R. C. Das,1998

The Third World in Global Environmental Politics Marian A. L. Miller,1995 Both the North and the South have significant stakes in the global environment but they bring differing interests and agendas to the bargaining table An inequitable global economic system and the internationalization of economies have reduced Third World countries control over the disposition of their resources and affected their strategies in global environmental negotiations Focusing on these issues Miller traces the efforts of developing countries to influence evolving environmental regimes Negotiations regarding hazardous waste trade biodiversity technology transfer and atmosphere and climate serve as case studies Ecological Policy and Politics in Developing Countries Uday Desai,1998-04-16 Examines in depth the ecological problems policies and politics of ten major developing countries

Globalization, Political Institutions and the Environment in Developing Countries Gabriele Spilker,2013-01-04 Though industrialized countries are usually the ones indicted when environmental pollution is discussed over the few last years the rate of emissions in developing countries has increased by a startling amount The fallout from this increase is evidenced by the struggle of cities like Beijing to improve their air quality Yet there also exist developing countries such as Thailand that have managed to limit their emissions to more tolerable levels raising the question why are some developing countries more willing or able to take care of their environment than others In this volume Gabriele Spilker proposes two factors for the differences in developing countries environmental performance integration into the international system and domestic political institutions Focusing on developing countries generally but also closely examining important global powers such as China and India Spilker employs a rigorous quantitative analysis to demonstrate the importance of considering various aspects of the international system in order to draw more comprehensive conclusions about how globalization affects environmental performance She asserts that democratic political institutions can shield developing countries from the negative consequences of either trade or foreign direct investment But at the same time developing countries by avoiding demanding commitments are more likely to use environmental treaties as a cover than as a real plan of action Adding a new dimension to the existing body of research on environmental quality and commitment

Spilker convincingly demonstrates how international and domestic political factors interact to shape developing countries ability and willingness to care for their natural environment *In The U.S. Interest* Janet Welsh Brown,2021-11-28 In the U S interest explores the implications this growing interdependence holds for US foreign policy in the developing world It links US jobs trade and geopolitical interests to the environmental economic and political health of key developing nations Case studies of Mexico Egypt Kenya and the Philippines analyze Third World resource environmental and population problems revealing the need for US policymakers to recognize US national interest in international environmental cooperation

Environment and the Developing World A. Gupta,M.G. Asher,1997 *Green Development* Bill Adams,2019-12-05 The concept of sustainability lies at the core of the challenge of environment and development and the way governments business and environmental groups respond to it Green Development provides a clear and coherent analysis of sustainable development in both theory and practice Green Development explores the origins and evolution of mainstream thinking about sustainable development and offers a critique of the ideas behind them It draws a link between theory and practice by discussing the nature of the environmental degradation and the impacts of development It argues that ultimately green development has to be about political economy about the distribution of power and not about environmental quality Its focus is strongly on the developing world The fourth edition retains the broad structure of previous editions but has been updated to reflect advances in ideas and changes in international policy Greater attention has been given to the political ecology of development market based and neoliberal environmentalism and degrowth This fully revised edition discusses the origins of thinking about sustainability and sustainable development and its evolution to the present day the ideas that dominate mainstream sustainable development including natural capital the green economy market environmentalism and ecological modernisation critiques of mainstream ideas and of neoliberal framings of sustainability and alternative ideas about sustainability that challenge business as usual thinking such as arguments about limits to growth and calls for degrowth the dilemmas of sustainability in the context of forests desertification food and farming biodiversity conservation and dam construction the challenge of policy choices about sustainability particularly between reformist and radical responses to the contemporary global dilemmas Green Development offers clear insights into the challenges of environmental sustainability and social and economic development It is unique in offering a synthesis of theoretical ideas on sustainability and in its coverage of the extensive literature on environment and development around the world The book has proved its value to generations of students as an authoritative thought provoking and readable guide to the field of sustainable development

The Developing World E. Ike Udogu,2012-10-04 Nation states in the developing world have seen a renaissance in their political social and economic structures Newly industrializing countries like Brazil Mexico China and India are poised to claim the 21st century as their own But economic conditions in many nations of the developing world still leave much to be desired especially with respect to its marginalized citizens whose incomes are often less than two dollars a day Scholars

continue to ask what academics political actors economic entrepreneurs and others committed to tackling the bane of underdevelopment in the developing world can do to improve the plight of these nations destitute populations The Developing World Critical Issues in Politics and Society explores the challenges presented by political cultural religious social and economic practices to the future development of these nation states The essays gathered here written by seasoned scholars with deep social political and academic roots in Africa Asia and Latin America explain how improvements in politics social arrangements and information communication technologies contribute to the effectiveness of emerging nations internal politics and their influence on world affairs Individual essays consider such key issues as how to develop more efficiently the processes of liberal democratization how to apply more uniformly the law enforcement policies of governments to all citizens in a society how the marginalization of women hampers national development how the political development of Mexico as a linguistic regional power has influenced the rest of Central America how development and protection of the environment are linked how an effective application of information communication technologies can enhance the quality of education and boost growth at all levels in a polity This work will interest scholars focused on the developing world social and public policy international politics and social and political theory

The Developing World and the Environment

Rajendra Ramlogan, 2004-09-28 The seeds of the demise of many early civilizations Mesopotamian Greek Roman and Mayan found fertile ground in environmental conflicts The roots of environmental crises are also embedded in the industrial revolution the advent of the age of science and technology urbanization changes in agriculture the population explosion and the rise in consumerism It is no surprise that even today the global village is highly concerned with the issue of environmentalism In this study author Rajendra Ramlogan calls for a re examination of the legal and institutional framework for protection of the global environment within the context of the special needs of the developing world This unique third world perspective on international environmental law is suitable for college level courses

Growing Pains Walter Wehrmeyer, Jacob Mulugetta, 2017-10-19 Environmental management is a global phenomenon embracing all businesses in all countries whether or not there already exists an organised response to managing environmental impacts Today there are gross inequalities between the world's richest and poorest nations in terms of income distribution consumption patterns access to resources and environmental impact Yet both the developed north and the developing south are committed at least in words to achieving sustainable development Public awareness of environmental issues in the North has been rising in recent years and further degradation is now largely minimized through more stringent regulatory regimes voluntary agreements and growing consumer and stakeholder pressure on corporations Still the north is continuing to lead an environmentally unsustainable lifestyle as environmental improvements are nullified by overall increases in consumption levels In the south a billion people still do not have access to the most basic needs Poor countries need to accelerate their consumption growth if they are to ensure that the lives of their people are enriched However with rapid economic growth

and corresponding increases in consumption now under way their environmental impact is soon to become substantially greater In a world that strives towards stemming global crises such as climate change the path already taken by the rich and high growth economies over the past century cannot be repeated by the south if the desired objective is to create a future that is truly sustainable *Growing Pains* examines environmental management in the south from a number of perspectives It is designed to stimulate the discussion about the role that corporations and national and international organizations play in sustainable development It does not offer panaceas as each country has its own problems and opportunities and after almost 50 years of failed panacea oriented economic development policy transfer from the north to the south it is time to abandon hope for universal solutions and instead look to individual approaches that work The book is divided into five themes globalization the role of business a focus on national strategies trade and the environment and the organizational and structural challenges of sustainable development With contributions from an outstanding collection of authors in both the developed and developing worlds including UNIDO the Thailand Environment Institute Arthur D Little Inc Shell Peru IUCN the Russian Academy of Sciences and IIED this important and unique new book presents a body of work that will provide essential reading for businesses working in developing countries environmental and developmental NGOs and researchers engaged in the debate and sharing of best practice in this increasingly critical subject area

Politics and Society in the Developing World Peter Calvert, Susan Calvert, 2014-06-03 In a world seemingly surfing a wave of unprecedented affluence it is sobering to be reminded that only thirty out of nearly two hundred countries can really be classified as advanced industrialized countries Eighty per cent of the world's population lives in the developing world This popular concise introduction scrutinises the developing world its varied political institutions and the key social economic and environmental issues at the heart of contemporary debates Wide ranging and clearly written *Politics and Society in the Developing World* begins by providing a brisk survey of the major theoretical and methodological interpretations of the social impact of development It then details the factors which determine the parameters of the developing world before moving on to examine its infrastructure and the crises currently facing it The book also covers the social and economic contexts of developing societies the international arena and its impact on the developing world state building and the tension between dictatorship and democratization The book focuses on four policy areas aid trade tourism and the environment

Sustainable Real Estate in the Developing World Raymond Talinbe Abdulai, Kwasi Gyau Baffour Awuah, 2021-03-29 *Sustainable Real Estate in the Developing World* offers a perfect and ideal synthesis of works that examine sustainability within various facets of real estate and urban development in the developing world A must read for academics researchers policy makers and students in all the built environment disciplines

Global Development and the Environment Joel Darmstadter, 2016-03-17 In preparation for the United Nations Conference on Environment and Development in Rio de Janeiro in June 1992 this study aimed to detail enduring environmental issues that might or might not have been considered at the conference Originally

published earlier that year Global Development and the Environment questions the compatibility of goals for environmental protection natural resource consequences and economic growth in relation to sustainability with essays on important topics such as biodiversity agriculture and population issues This title will be of interest to students of Environmental Studies and Economics **Trade and Environment** ,1992 **Environmental Management: Issues and Concerns in Developing Countries** Pradip K. Sikdar,2021-03-17 This book deals with issues and concerns for the human environment in the developing countries incorporating natural processes and systems pollution removal technology energy conservation environmental impact assessment process economics culture political structure and societal equity from a management point of view Solutions to the emerging problems of the environment need a paradigmatic shift in approach from a process based model to a socio political economic model Hence environmental management should involve equality and control over use of the finite natural resources and the balance between Earth s biocapacity and humanity s ecological footprint Changes such as green technologies human population stabilization and adoption of ecologically harmonious lifestyles are absolutely essential and will require redesigning of political institutions policies and revisiting forgotten skills of sustainable practices of environmental management These challenges should centre on environment governance using the concepts of common property equity and security This book is relevant for academics professionals administrators and policy makers who are concerned with various aspects of environment management and governance **Green Development Bill** Adams,2019-12-20 In print continuously since 1990 Green Development has won a place as a leading account of sustainable development used by generations of undergraduate and graduate students This authoritative and readable text provides a clear and coherent analysis of sustainable development in theory and practice The fourth edition of Green Development is fully revised and up to date It offers clear insights into the challenges of environmental sustainability and social and economic development The book has proved its value to generations of students as an authoritative thought provoking and readable guide to the field of sustainable development The Mediterranean Marine Environment and the Development of the Region Norton Sydney Ginsburg,Sidney Joseph Holt,William W.
