Environmental Destruction:

Ideology, Social Theory, and the Environment William D. Sunderlin, 2003 Does human population growth threaten the environment or does it guarantee we will safeguard it Is economic growth the key ecological problem or is it in fact the solution What will be the leading force to save the planet civil society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity

Environmental Impact Assessment Alan Gilpin, 1995 This book examines the crucial role of EIA in government decision making in Europe the Nordic countries North America Asia and the Pacific

Dubya Donald Lord, 2005-08 The United States is suffering from dangerous smog dirty water and other unhealthy environmental hazards However only a handful of us are aware that each year tens of thousands of Americans die prematurely from environmental causes Much of this death and destruction is caused by the deceit of our own government The federal government which is supposed to protect the environment is doing the opposite and getting away with it Justifiably the world is focusing on the threat of terrorism but much of the world is also focusing on an equally dangerous threat environmental destruction It may be true that thousands have perished in terrorist attacks but the fact is that millions worldwide die from environmental causes every year Air pollution unsafe water and other environmental hazards are killing more people now than ever before and the costs of global warming will increase that number dramatically Many nations are already fighting this war especially in Europe but the United States has not yet joined the battle Author Don Lord PhD charges that it is the responsibility of the United States government to protect all its citizens Until those in government positions work together to stop pollution citizens of the United States will remain at great risk

Committee on Government Operations, 1970 Education and the Challenge of Environmental Problems, 1977 **Social Causes of Environmental Destruction in Latin America** Michael Painter, William H. Durham, William Durham, 2025-12-10 The Social Causes of Environmental Destruction in Latin America is a timely examination of critical cases of land degradation deforestation and resource depletion in Central and South America The contributors seasoned researchers with years of experience in the regions they discuss convincingly document the idea that the causes of environmental destruction have their origins in social relations specifically the dynamics of social classes with fundamentally divergent interests The conditions facing impoverished families on the one hand and the granting of land on a concessionary basis to powerful individuals and corporations on the other create incentives to extensive land use without conservation The book thus refutes simplistic arguments that address environmental destruction as an outcome of population growth and suggests that advocacy for social equity is not merely an idealistic quest but an ecological imperative This book is essential reading for anyone interested in development issues and should appeal particularly to anthropologists sociologists economists demographers and geographers *Ecocide of Native America* Donald A. Urban, Gary S. Stacey, 1974 The handbook presents recommended procedures for use by Army personnel in the preparation and processing of environmental impact assessments EIA and statements EIS The procedures outline in step by step fashion the progressive actions necessary to satisfy the requirements of the National Environmental Policy Act of 1969 and the subsequent guidelines issued by the President's Council on Environmental Quality CEQ charging all federal agencies to utilize a systematic and interdisciplinary approach to incorporate environmental considerations into their decision making process Before Earth Day Karl Boyd Brooks, 2009 Dispels the conventional belief that American environmental law was a product of the 1970s finding instead that its origins go back to New Deal and Cold War policies and traces the dramatic post war shift in the way Americans viewed the natural environment **Historical Settlement of Liberia and Its Environmental Impact** Syrulwa L. Somah, 1995 This powerful book argues persistently that the historical settlement of liberated Americans of African descent had a destabilizing impact on the geography politics social and economic structure environment and culture of Liberia The author also draws attention to the environmental consciousness of indigenous Liberians and delves into the historical roots of the principle health problems and industrial activities threatening Liberia's environment Contents Glossary Liberia Historical Roots Geographical Description of Liberia The Arrival of New Settlers
