**Global Environmental Diplomacy** Mostafa K. Tolba, 2008-01-25 Foreword by Mario Molina As Executive Director of the United Nations Environment Programme UNEP from 1976 to 1992 Mostafa K Tolba had as much insight into and influence on the development of international environmental policy as anyone In this book he tells the story of the negotiations that led to a number of landmark agreements such as the Vienna Convention on Ozone and its Montreal Protocol the Basel Convention on Hazardous Wastes and the Biodiversity Convention The book stands as the legacy of an important and charismatic figure who played a pivotal role during the first phase of global environmental diplomacy Tolba concentrates on the context in which governments conclude that particular issues are ripe for binding international cooperation and on the factors that influence them during negotiations such as science the media nongovernmental organizations politicians business and industry and the public The areas he discusses include the evolution of environmental law environmental soft laws principles and guidelines rather than treaties binding regional regimes such as the Regional Seas Program and the Shared Freshwater Resources Program the ozone layer global warming hazardous wastes the loss of biological diversity and ways to make international agreements work

**Effective Forms of Environmental Diplomacy** Leila Nicolas, Elie Kallab, 2021-06-10 This book holistically covers the issue of environmental diplomacy by building a firm foundation for readers to understand the different dimensions of the topic The book begins by exploring the progress the world community has made in understanding the importance of diplomacy in preserving the environment for humankind s survival peace and security Then it critically analyses the existing system of international environmental treaties and highlights its political and legal gaps It further examines specific case studies on multilateral diplomacy as well as both formal and informal diplomacy in cases from Europe and the United States to evaluate the diplomatic models followed by different stakeholders in the field Through this case study analysis the book develops theoretical and empirical frameworks that can be applied to study how international and regional organisations and NGOs maintain and put forward environmental agendas at an international level It also examines the effect of the COVID 19 pandemic on the environment to highlight the challenges to reach an effective and equitable environmental governance and draw conclusions around effective versus ineffective forms and tools of environmental diplomacy This book will be of great interest to students and scholars of environmental diplomacy and environmental law and governance as well as practitioners working in this important field

**Earth Negotiations** Pamela S. Chasek, 2001 Earth

Negotiations develops a phased process model that can enable greater understanding of the process by which international environmental agreements are negotiated By breaking down the negotiating process into a series of phases and turning points it is easier to analyze the roles of the different actors the management of issues the formation of groups and coalitions and the art of consensus building Six discernible phases and five associated turning points within the process of multilateral environmental negotiation are identified and explained The model is then used to see if there is anything that occurs in the earlier phases of negotiation that affects subsequent phases and if there is anything in the process that may have an effect on the outcome The overall goal is to determine what lessons can be learned from past cases of multilateral environmental negotiation in order to help both practitioners and scholars strengthen the negotiating process and the quality of its results

**Global Environmental Diplomacy** Mostafa Kamal Tolba,Iwona Rummel-Bulska,1998 Tolba tells the story of the negotiations that led to a number of landmark agreements such as the Vienna Convention on Ozone and its Montreal Protocol the Basel Convention on Hazardous Wastes and the Biodiversity Convention

*Chinese Perspectives on the Environment and Sustainable Development* Wenhui Ye,2013-07-15 With China's rapid growth over the past several decades the detrimental effects of industrial growth on the environment have become ever more apparent In this collection of articles from some of China's most distinguished political scientist economist and environmentalist we find the emerging debate on environmentalism unfolding as Chinese try to find their own way At the core of these concerns is a debate on balancing the needs of economic development with responsibilities to the planet and the degree to which that responsibility applies to China as a developing country These articles seek to illustrate broader principles for environmental policies and international support as well as more specific projects in China that have been tested and those that have failed

International Environmental Diplomacy John Edward Carroll,1990 **Environmental Diplomacy** Lawrence E. Susskind,Saleem Hassan Ali,2014 Environmental Diplomacy provides an accessible narrative on understanding the geopolitics of negotiating international environmental agreements and clear guidance on improving the current system In

this book authors Lawrence Susskind and Saleem Ali expertly observe international environmental negotiations to effectively inform the reader on the geopolitics of protecting our planet This second edition offers an additional perspective from the Global South as well as providing a broader analysis of the role of science in environmental treaty making Navigating Peace and Sustainability in an Increasingly Complex World Ayyoob Sharifi, John Lee Candelaria, Dahlia Simangan, Shinji Kaneko, 2024-11-16 This book a sequel to a well received book titled Bridging Peace and Sustainability Amidst Global Transformations delves deeper into the entwined roots of peace and sustainability and emphasizes their interdependence How are peace and sustainability interconnected and what key factors define the relationship between them These questions were examined at the NERPS 2024 conference in Hiroshima and are central to our narrative In this book we explore the synergy of peace and sustainability through theoretical frameworks and real world examples We recognize that while the 2030 Agenda for Sustainable Development has acknowledged the link between peace and sustainability a significant gap remains Too often efforts to promote peace and sustainability run parallel never intertwining losing the chance to bolster each other We argue for merging the peace and sustainability agendas to confront contemporary challenges calling for action to enhance and take advantage of their mutual reinforcement Through diverse perspectives this collection illuminates the social economic and environmental dimensions of this nexus serving as a guide for policymakers a reference for researchers and a catalyst for dialogue among sectors committed to achieving the Sustainable Development Goals Environmental Diplomacy, 1997 Global Warming and China's Environmental Diplomacy Hongyuan Yu, 2008 Since the early 1990s there are two increasingly hot topics attracting numerous scholarly attentions in Chinese politics first it is the transformation of China's political system Second it is China's increasingly involvement in international regimes Nevertheless until now there are only a few scholars to work out the distinctive relations between them and even less people work on the bureaucratic politics level By explaining and evaluating the development of policymaking coordination in the United Nations Framework Convention on Climate Change UNFCCC the author demonstrates the argument that international regimes have contributed to the development of coordination in Chinese Policymaking taking the UNFCCC as a departure **International Environmental Politics** Lee-Anne Broadhead, 2002 Broadhead political science University College of Cape Breton Nova Scotia writes from a deepening concern that the very way environmental issues are thought about and the negotiations that result from their common framing are themselves leading to the further deterioration of the natural environment The author owes her brand of critique to the Frankfurt School especially in terms of its analysis of the Enlightenment notion of nature scientifically knowable and technologically domitable Showing how Enlightenment thought informs international relations Broadhead targets green diplomacy the way that national and international financial bodies counter environmental critique how globalization is sold as inevitable irresistible and beneficial and how international agreements on ozone depletion and climate change fail their stated aims So as not to end in dialectic negation Broadhead offers positive alternatives to green
