

CONTRAST

- COLOR**  Similar elements in a design should stand apart from one another. One way to do this is to use contrast. Good contrast in a design - which can be achieved using elements like color, tone, size, and more - allows the viewer's eye to flow naturally.
- TOUR/VOLUME**  To the left, you can see it easy to create contrast in your design.
- SIZE/SHAPE** 
- DIRECTION** 

ALIGNMENT

In good alignment in a design means that every element is in a visually connected to another element. Alignment allows for consistency, nothing feels out of place or disconnected when alignment has been looked well.

PRINCIPLES of DESIGN

with reference points

REPETITION

Repetition breeds consistency in a design. Once a design pattern has been established - for example, a button border or a specific typography styling - repeat the pattern to establish consistency. The short version: To create a style for each element in a design and use it on similar elements.

PROXIMITY

Proximity allows for clear unity in a design. If two elements are related to each other, they should be placed in close proximity to one another. Being in close proximity allows related elements, organization, and increases viewer comprehension.

Imagine how ridiculous it would be if the proximity used on the graphic were located on the other side of the document.
