The focus is upon the Mother of the World's department and the disastrous events that happened upon the moon in that far distant past when it harboured a human kingdom. The key individuals that went aberrant then through grievous sex magical practices have either since been converted upon the earth to become the Hierarchy of Enlightened Being or else are the forces of evil, the dark brotherhood that have presently taken over planetary affairs. That ancient history is traced to the next globe in our earth. Scheme in the fifth Round that will bear a human kingdom. The astrological conditions that set the stage for this is first established, viewed from above down rather than from the normal earth-centred astrology. The focus is upon the activities of the former Logos of the moon Chain, which was a Taurean dispensation ruled by the Mother's department. Explained is His subsequent fall and incarnation upon the earth coupled with a similar though lesser fall of Sanat Kumara. He did so to properly monitor the consequent dangerous situation upon the earth because of the vast number of evil entities from the moon that subsequently incarnated to admix with the earth's indigenous humanity. The events producing the great flood that sank the Atlantean continent have their true genesis here.

Cassirer's Transformation: From a Transcendental to a Semiotic Philosophy of Forms Jean Lassègue, 2020-03-11. This book presents the transformation of Cassirer's transcendental point of view. At an early stage Cassirer was confronted with a scientific crisis triggered by the emergence of various forms of objective knowledge such as the plurality of geometric axiom systems and non-Euclidean geometry in relativistic physics. He finally developed a solution to the problematic unity of objective knowledge by replacing the overarching notion of objectivity with that of forms of objectification. This led him to consider the notion of symbolic forms as the driving force in the objectification process. This concept would become instrumental in demonstrating that the objective and human sciences are not adversaries; they merely differ in their modes of semiotic construction. These modes cannot be summarized in a fixed list of symbolic forms but operate transversally at a level where Cassirer distinguishes between three specific operators: Expression, Evocation, and Objectification. The last part of the book investigates how the relationships between these three operators stabilize specific symbolic forms. Four of these forms are then studied as examples: Myth and Ritual, Language, Scientific Knowledge, and Technology.
