France and European Security Robbin Frederick Laird,CENTER FOR NAVAL ANALYSES ALEXANDRIA VA.,Center for Naval Analyses,United States. Office of Naval Research,United States. Office of the Chief of Naval Operations,1986 In the 1960s French defense policy emphasized the protection of French territory rather than the collective security of France and her European allies This began to change in the late 1970s The French contribution to European security is now a matter of considerable debate within France This memorandum examines the issues and the options that are involved Keywords Doctrine Foreign policy France Government France International politics International relations National security France NATO Nuclear forces Political alliances Politics Security Treaties Western alliance Western Europe Western security International **France and Military Satellites** , Background The dominance of NATO as the principal security organisation in Western Europe during the Cold War and of the US within NATO explains at least in part why the space based command and control assets in place in the Western European theatre at the end of the Cold War were almost exclusively American THE FUTURE OF THE SYSTEMS A number of policy strands are feeding into the logic debates and arguments about the future of the satellite systems outlined above and summarised in Table 1 IMPACT ON THE FUTURE OF EUROPEAN SECURITY The plans appear to indicate a French belief that the so called arc of crisis which stretches from East Central Europe through the Middle East and across the Maghreb will form a central and perhaps even dominant part of the European security agenda into the 21st century The key issue here is the extent to which the reorientation of European military deployments and plans towards the Maghreb and Middle East will undermine Europe s own role and that of pro western governments in the region in helping to stabilise the region economically and politically check the spread of weapons of mass destruction and improve regional security Conclusion This paper has suggested that a quiet revolution is taking place within Europe with the introduction of a range of military satellite systems which have the potential to significantly influence many of the core issues in European security including the US European defence relationship the development of a distinct European defence and security identity and the relationship of Europe *France, Germany, and the Development of a European Security and Defense Identity* Timothy D. Showers,2000-06-01 The concept of a European Security and Defense Identity ESDI within NATO is as old as the proposal made in 1950 by French Prime Minister Rene Pleven to form a European Defense Community EDC that would integrate French and German military forces into a common European army However the differences between French and German strategic culture have hampered efforts to establish an ESDI One of the most critical dilemmas stems from the clash between a the German belief that United States engagement is essential to European stability and should not be undermined and b the long standing goal of French leaders to develop a Europe that is more independent of American influence Another key dilemma has involved French efforts to reconcile the Gaullist legacy of

preserving national autonomy with an ever increasing commitment to European integration and France's growing role in the integrated defense and security architecture of Europe. As long as French leaders continue to be influenced by de Gaulle's approach to foreign and national security policy, many obstacles to furthering the development and strengthening the capabilities of an ESDI will persist. *European Security in the New Political Environment* James H. Wylie, 2017-07-28

European Security in the New Political Environment provides a thorough analysis of the detail and nature of post-Cold War security issues from both traditional and new security agendas, assessing the current efficacy of current institutions and policies to address these issues. *Redefining European Security* Carl C. Hodge, 2002-09-11. First published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

NATO and the Future of European Security Sean Kay, 1998. Tracing NATO's formative years, its Cold War development, and its post-Cold War evolution, Sean Kay draws on his policy experience in Brussels and Washington to provide unique insights into contemporary policy challenges, including NATO's outreach to the East and its Partnership for Peace, peacekeeping, and the future of the Balkans, enlargement, and the role of Russia in Europe. NATO's internal military adaptation and the future of the transatlantic relationship. Kay argues that although NATO has evolved to some degree, it remains an institution dependent upon the United States, with uncertain long-term prospects for playing a constructive role in Europe. Indeed, the author shows that if not implemented carefully, NATO enlargement may actually decrease rather than increase stability in the region.

The Diplomatic Struggle for European Security and the Stabilization of Peace Edvard Beneš, 1925. *The New European Security Disorder* S. Duke, 1994-10-07. The *New European Security Disorder* presents a clear and comprehensive overview of the main actors, institutions, and changes in European security since the end of the Cold War. Special emphasis is put on the assessment of threats to Europe's security, the lack of coherent leadership in Bosnia and elsewhere, and the need for pan-European security institutions.

European Security in the Twenty-First Century Adrian Hyde-Price, 2007-02-12. Combining a sophisticated theoretical analysis with detailed empirical case studies, this book provides an original view of the challenges and threats to a stable peace order in Europe. The end of Cold War bipolarity has transformed Europe. Using structural realist theory, Adrian Hyde-Price analyzes the new security agenda confronting Europe in the twenty-first century. Europe, he argues, is not primed for peace as mainstream thinking suggests; rather, it faces new security threats and the challenge of multipolarity. This critical and original volume looks at European security after the Iraq War, the failure of the EU constitution, and the change of government in Germany. Reflecting on the inherently competitive and tragic nature of international politics, it concludes that realism provides the only firm foundations for an ethical foreign and security policy.

European Security in the Twenty-First Century will appeal to students and scholars of international relations, European politics, and security studies. *Security, Defense, Discourse and Identity in NATO and Europe* Falk Ostermann, 2018-08-06. Analyzing changes in the role and place of NATO, European integration, and Franco-American relations in foreign policy discourse under Presidents Jacques Chirac and

Nicolas Sarkozy this book provides an original perspective on French foreign policy and its identity construction The book employs a novel research design for the analysis of foreign policies which can be used beyond the case of France by combining the discourse theory of the Essex School with Interpretive Policy Analysis to examine political ideas and how they are organized into a foreign policy identity On these grounds the volume undertakes a comparative analysis of parliamentary and executive discourse of President Chirac s failed attempt at NATO reintegration in the 1990s Sarkozy s successful attempt in the 2000s and the Libyan War Ostermann depicts French foreign policy and identity as turning away from the European Union atlanticizing and losing its American nemesis As a result France uses a much more pragmatic de unionized and pro American strategy to implement foreign policy objectives than before Offering a new and innovative explanation for a major change in French foreign policy and grand strategy this book will be of great interest to scholars of NATO European defense cooperation and foreign policy

France and The Search For Autonomy In European Security, 2004 This thesis depicts the French security and foreign policy regarding European security The study covers French foreign and security policy in the aftermath of the Second World War the period of Charles de Gaulle Fran ois Mitterrand and Jacques Chirac The theme of autonomy in European security is maintained throughout the years under scrutiny It is argued that the search for autonomy has been a constant goal of the French security and foreign policy It is also maintained that France has a policy of employing organizations like NATO and European Union as an instrument to advance its own causes where possible

France and Germany Nicole Koenig, Marie Walter-Franke, 2017 European Security and the SALT Process David Scott Yost, 1981

European Security in a Global Context Thierry Tardy, 2008-12-10 This new edited volume examines contemporary European security from three different standpoints It explores security dynamics first within Europe second the interaction patterns between Europe and other parts of the world the United States Africa the Middle East China and India and finally the external perceptions of European security The first part of the book analyses the European security landscape The roles of EU NATO and the OSCE are given particular attention as is the impact of their evolution or enlargement on the European security architecture and European security dynamics In this context Russia s repositioning as a major power appears as a shaping factor of contemporary European geopolitics The second part presents European security from an external perspective and considers interactions between Europe and other states or regions Security trends and actors in Europe are examined from an American Chinese and Indian perspective while Europe Africa and Europe Middle East relations are also addressed This book will be of great interest to students of European Security European politics and IR in general

How Can France's New NATO Policy be Explained Vis-à-vis European Security Cooperation? Douglas L. Bentley, Army War College (U.S.). Senior Service College Fellowship Program, Queen's University (Kingston, Ont.). Centre for International Relations, 2010 This paper will demonstrate that France s newest stance towards NATO is linked to the status of European Security Cooperation by weighing these two questions 1 Does France rejoin NATO to facilitate the Europeanization of NATO

while simultaneously trying to enhance European Security and Defence Policy ESDP and 2 Because of the remaining uncertainty in spite of the Lisbon Treaty with ESDP does France need to secure its influence and options to act globally security power etc via NATO But first we must trace how France s policy of creeping reintegration back into NATO has evolved in order to maintain enhance France s influence in security matters both within Europe and globally But before we do that a brief overview on the establishment of exception fran aise is in order Finally this work will offer some possible explanations on what France s return to NATO means to the future of the alliance the transatlantic link and the future of ESDP The research methodology included interviews with senior leadership and staff in the office of the Assistant Secretary of the Army Acquisition Logistics and Technology Army G 3 5 7 and the MDA in addition to a comprehensive literature review of government and independent documents on BMDS development *Southern European Security in the 1990s* Roberto Aliboni,1992 In the aftermath of the Gulf War with debates still raging about the so called New World Order little attention has been given to the countries of Southern Europe *The Malady of Europe* Marcus Eli Ravage,1923 *European Security* Michael Charles Pugh,1992 This work covers the period after the end of the Cold War and specifically addresses the roles of the United States and the Soviet Union European Community security police Germany s role as bridge or frontier between East and West and transnational processes Finally the book asks whether the world is moving from a Cold War to a cold peace
