## **Event Cognition:**

*Event Cognition* Gabriel A. Radvansky, Jeffrey M. Zacks, 2014-06-09 Much of our behavior is guided by our understanding of events We perceive events when we observe the world unfolding around us participate in events when we act on the world simulate events that we hear or read about and use our knowledge of events to solve problems In this book Gabriel A Radvansky and Jeffrey M Zacks provide the first integrated framework for event cognition and attempt to synthesize the available psychological and neuroscience data surrounding it This synthesis leads to new proposals about several traditional areas in psychology and neuroscience including perception attention language understanding memory and problem solving Radvansky and Zacks have written this book with a diverse readership in mind It is intended for a range of researchers working within cognitive science including psychology neuroscience computer science philosophy anthropology and education Readers curious about events more generally such as those working in literature film theory and history will also find it of interest

*Event Power* Chris Rojek, 2013-02-21 Rojek s argument is a psychological one although his message is political global events build on people s needs to feel empowered and jointly engaged in the pursuit of a higher purpose they allow a break from daily routines provide an illusion of intimacy and social membership and create a sense of self validation and personal gratification In short participation in such events makes us feel good At the same time the real effect of global events seems to be the maintenance of global inequality and social injustice as well as huge profits for the organizations involved in planning commercializing and securing these happenings In sketching out this palliative function of global events from the perspective of people s needs on the one hand and unveiling their puppet masters backstage on the other Rojek s book presents a compelling account of the role of organized events in modern society Organization Studies Events dominate our screens our lives and increasingly global geopolitics Analysis of events and their management has remained rooted in leisure and management studies until now This breakthrough book provides an introduction to event management while also situating events in questions of power and social control Rojek powerfully argues that events are essential elements in corporate state partnerships of invisible government that have revived the romance of charity as to form illusory communities while cloaking power imbalances and social inequalities Events are moving politics from the old idea of the personal is political to the new more seductive notion that representation is resistance Wielding rich case studies from the World Cup and the Olympics to Live Aid Burning Man and Mardi Gras Rojek presents a dazzlingly original account of communication power social ordering and control It is essential reading in media communication studies and across the social sciences

*Event Representation in Language and Cognition* Jürgen Bohnemeyer, Eric Pederson, 2010-12-23 *Event Representation in Language and Cognition* examines new research into how the mind deals with the experience of events Empirical research into the cognitive processes involved when people view events and talk about them is still a young field The chapters by leading experts draw on data from the description of events in spoken and signed languages first and second

language acquisition co speech gesture and eye movements during language production and from non linguistic categorization and other tasks The book highlights newly found evidence for how perception thought and language constrain each other in the experience of events It will be of particular interest to linguists psychologists and philosophers as well as to anyone interested in the representation and processing of events

**Ten Lectures on the Representation of Events in Language, Perception, Memory, and Action Control** Jeffrey M. Zacks,2020-02-10 The representation of events is a central topic for cognitive science In this series of lectures Jeffrey M Zacks situates event representations and their role in language within a theory of perception and memory Event representations have a distinctive structure and format that result from computational and neural mechanisms operating during perception and language comprehension A crucial aspect of the mechanisms is that event representations are updated to optimize their predictive utility This updating has consequences for action control and for long term memory Event cognition changes across the adult lifespan and can be impaired by conditions including Alzheimer s disease These mechanisms have broad impact on everyday activity and have shaped the development of media such as cinema and narrative fiction

*Event Cognition* Viki McCabe,Gerald J. Balzano,2014-02-24 This series of volumes is dedicated to furthering the development of psychology as a branch of ecological science In its broadest sense ecology is a multidisciplinary approach to the study of living systems their environ m ents and the reciprocity that has evolved between the two The purpose of this series is to form a useful collection a resource for people who wish to learn about ecological psychology and for those who wish to contribute to its development The series will include original research collected papers reports of conferences and symposia theoretical monographs technical handbooks and works from the many disciplines relevant to ecological psychology

**Perspectives on Pantomime** Przemysław Żywiczyński,Johan Blomberg,Monika Boruta-Żywiczyńska,2024-02-15 Pantomime is a unique form of communication which we improvise on the fly to transmit information when unable to use language for example during intercultural contacts or when the use of language is blocked or constrained as in the case of some medical conditions or the game of charades Pantomimic communication has been investigated from a number of perspectives including neuropsychological developmental and gesture research Recently pantomime has come under the attention of evolutionary linguistics as a strong candidate for a precursor of verbal communication The volume *Perspectives on pantomime evolution development interaction* brings together authors who are at the forefront of these studies which challenge the notion that pantomime is merely a fallback mode of expression This multidisciplinary journey traverses language evolution cognitive science cognitive semiotics sign

language linguistics psychology and gesture studies to unveil the profound role that pantomime plays in human communication

Event Structure Perception Studies in Perceiving, Remembering, and Communicating Jeffrey Martin Zacks, 1999

Understanding Events Thomas F. Shipley, Jeffrey M. Zacks, 2008-02-25 We effortlessly recognize all sorts of events from simple events like people walking to complex events like leaves blowing in the wind We can also remember and describe these events and in general react appropriately to them for example in avoiding an approaching object Our phenomenal ease interacting with events belies the complexity of the underlying processes we use to deal with them Driven by an interest in these complex processes research on event perception has been growing rapidly Events are the basis of all experience so understanding how humans perceive represent and act on them will have a significant impact on many areas of psychology Unfortunately much of the research on event perception in visual perception motor control linguistics and computer science has progressed without much interaction This volume is the first to bring together computational neurological and psychological research on how humans detect classify remember and act on events The book will provide professional and student researchers with a comprehensive collection of the latest research in these diverse fields
