Including international comparative analysis alongside national case studies this volume offers a wealth of information on the new trends which have emerged over the past decades all of which were discussed at the recent 9th International Symposium on Working Time Paris 2004 It looks at the increasing use of results based employment relationships for managers and professionals and the increasing fragmentation of time to more closely tailor staffing needs to customer requirements e.g short hours part time work Moreover as operating opening hours rapidly expand toward a 24 hour and 7 day economy the book considers how this has resulted in a growing diversification decentralization and individualization of working hours as well as an increasing tension between enterprises business requirements and workers needs and preferences regarding their hours This new reality has raised some other challenging issues as well and the volume addresses those such as increasing employment insecurity and instability time related social inequalities particularly in relation to gender workers ability to balance their paid work with their personal lives and even the synchronization of working hours with social times such as community activities The World's Work, 1901 *Manufacturers' Record*, 1908
