Heidegger, Coping, and Cognitive Science / Mark A. Wrathall, Jeff Malpas, 2000

Skillful Coping Hubert L. Heidegger and the Measure of Truth Denis McManus, 2012-11-29 Denis McManus presents a new interpretation of Martin Heidegger's early vision of our subjectivity and of the world we inhabit Heidegger's fundamental ontology allows us to understand the creature that thinks as also one which acts moves even touches the world around it a creature at home in the same ordinary world in which we too live our lives when outside of the philosophical closet it also promises to free us from seemingly intractable philosophical problems such as scepticism about the external world and other minds But many of the concepts central to that vision are elusive and some of the most widely accepted interpretations of Heidegger's vision harbour within themselves deep and important unclarities while others foist upon us hopeless species of idealism Heidegger and the Measure of Truth offers a new way of understanding that vision Drawing on an examination of Heidegger's work throughout the 1920s McManus takes as central to that vision the proposals that propositional thought presupposes a mastery of what might be called a measure and that mastery of such a measure requires a recognizably worldly subject These insights provide the basis for a novel reading of key elements of Heidegger's fundamental ontology including his concept of Being in the world his critique of scepticism his claim to disavow both realism and idealism and his difficult reflections on the nature of truth science authenticity and philosophy itself According to this

interpretation Heidegger's central claims identify genuine demands that we must meet if we are to achieve the feat of thinking determinate thoughts about the world around us *Normativity and Phenomenology in Husserl and Heidegger* Steven Crowell, 2013-04-25 Steven Crowell has been for many years a leading voice in debates on twentieth century European philosophy This volume presents thirteen recent essays that together provide a systematic account of the relation between meaningful experience intentionality and responsiveness to norms They argue for a new understanding of the philosophical importance of phenomenology taking the work of Husserl and Heidegger as exemplary and introducing a conception of phenomenology broad enough to encompass the practices of both philosophers Crowell discusses Husserl's analyses of first person authority the semantics of conscious experience the structure of perceptual content and the embodied subject and shows how Heidegger's interpretation of the self addresses problems in Husserl's approach to the normative structure of meaning His volume will be valuable for upper level students and scholars interested in phenomenological approaches to philosophical questions in both the European and the analytic traditions *Mind, Reason, and Being-in-the-World* Joseph K. Schear, 2013-03-05 John McDowell and Hubert L Dreyfus are philosophers of world renown whose work has decisively shaped the fields of analytic philosophy and phenomenology respectively *Mind Reason and Being in the World* The McDowell Dreyfus Debate opens with their debate over one of the most important and controversial subjects of philosophy is human experience pervaded by conceptual rationality or does experience mark the limits of reason Is all intelligibility rational or is there a form of intelligibility at work in our skilful bodily rapport with the world that eludes our intellectual capacities McDowell and Dreyfus provide a fascinating insight into some fundamental differences between analytic philosophy and phenomenology as well as areas where they may have something in common Fifteen specially commissioned chapters by distinguished international contributors enrich the debate inaugurated by McDowell and Dreyfus taking it in a number of different and important directions Fundamental philosophical problems discussed include the embodied mind subjectivity and self consciousness intentionality rationality practical skills human agency and the history of philosophy from Kant to Hegel to Heidegger to Merleau Ponty With the addition of these outstanding contributions *Mind Reason and Being in the World* is essential reading for students and scholars of analytic philosophy and phenomenology *Heidegger's Being and Time* Richard F. H. Polt, 2005 Heidegger's *Being and Time* Critical Essays provides a variety of recent studies of Heidegger's most important work Twelve prominent scholars representing diverse nationalities generations and interpretive approaches deal with general methodological and ontological questions particular issues in Heidegger's text and the relation between *Being and Time* and Heidegger's later thought All of the essays presented in this volume were never before available in an English language anthology Two of the essays have never before been published in any language Dreyfus and Guignon three of the essays have never been published in English before Grondin Kisiel and Thom and two of the essays provide previews of works in progress by major scholars Dreyfus and Kisiel *Intentionality and Intersubjectivity*
